Acting Director

BUREAU OF THE CENSUS
C. L. Kincannon, Acting Director

FOREIGN TRADE DIVISION
Barry M. Cohen, Chief

Members of the technical staff of the Foreign Trade Division
and their areas of responsibility are indicated below:

Senior Foreign Trade Statistician
Milton Kaufman

Trade Programs
Gerald F. Kotwas, Assistant Division Chief

Classification Systems Branch
Dwight E. Robeson, Chief

Trade Analysis Branch
Paul E. DeCiccio, Chief

Chemicals and Sundries Section
Irving L. Norfolk, Chief

Food, Animal and Wood Section
Gloria M. Still, Chief

Machinery and Vehicles Section
Kathleen J. Puzzilla, Chief

Minerals and Metals Section
Elsbeth G. Eddy, Chief

Textiles Section
Geraldine P. Wilson, Chief

Publications and Trade Information Branch
Minnie M. Davis, Chief

Trade Information Section
Juanita Noone, Supervisor

Data Processing
Arnold E. Levin, Assistant Division Chief

Current Systems Programming Branch
George L. Tormey, Chief

Special Projects and Systems Programming Branch
Lawrence Finnegan, Chief

Research and Methodology
Bruce C. Walter, Assistant Division Chief

Research and Statistical Measures Branch
Paula N. Muroff, Chief

Methodology and Quality Control Branch
Vacant, Chief

Transportation, Regulations and Procedures
Angel W. Marshall, Assistant Division Chief

Regulations Branch
Harold L. Blyweiss, Chief

Transportation Branch
Arthur E. Johnson, Jr., Chief

Procedures Branch
Vacant, Chief

Automated Export Reporting Program
Ruth D. Mangaroo, Program Manager

Library of Congress Card No. 00-000000

Introduction

1870-1871

Chapter I. Introduction

The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of a large body of data relating to the imports and exports of the United States. These statistics are designed to serve the needs of both government and nongovernment users who have a wide range of interests. The program, therefore, includes a variety of data presented in many different arrangements and released in the form of reports which are available by subscription and in reports and machine tabulations which are distributed to Department of Commerce field offices and U.S. Customs Service offices for public reference use. This publication is intended to serve as a guide to the various sources of foreign trade statistics and to inform users of the content and general arrangement of the data. It should, therefore, assist in the location of particular information and make it possible to utilize the available sources to better advantage.

As indicated, the foreign trade statistics program is designed to meet the needs of a variety of users. Thus, the statistics are put to many different uses to fulfill these needs. In order to assure compatibility between needs and uses, the outputs of the program were developed in consultation with the various types of users both in government and industry.

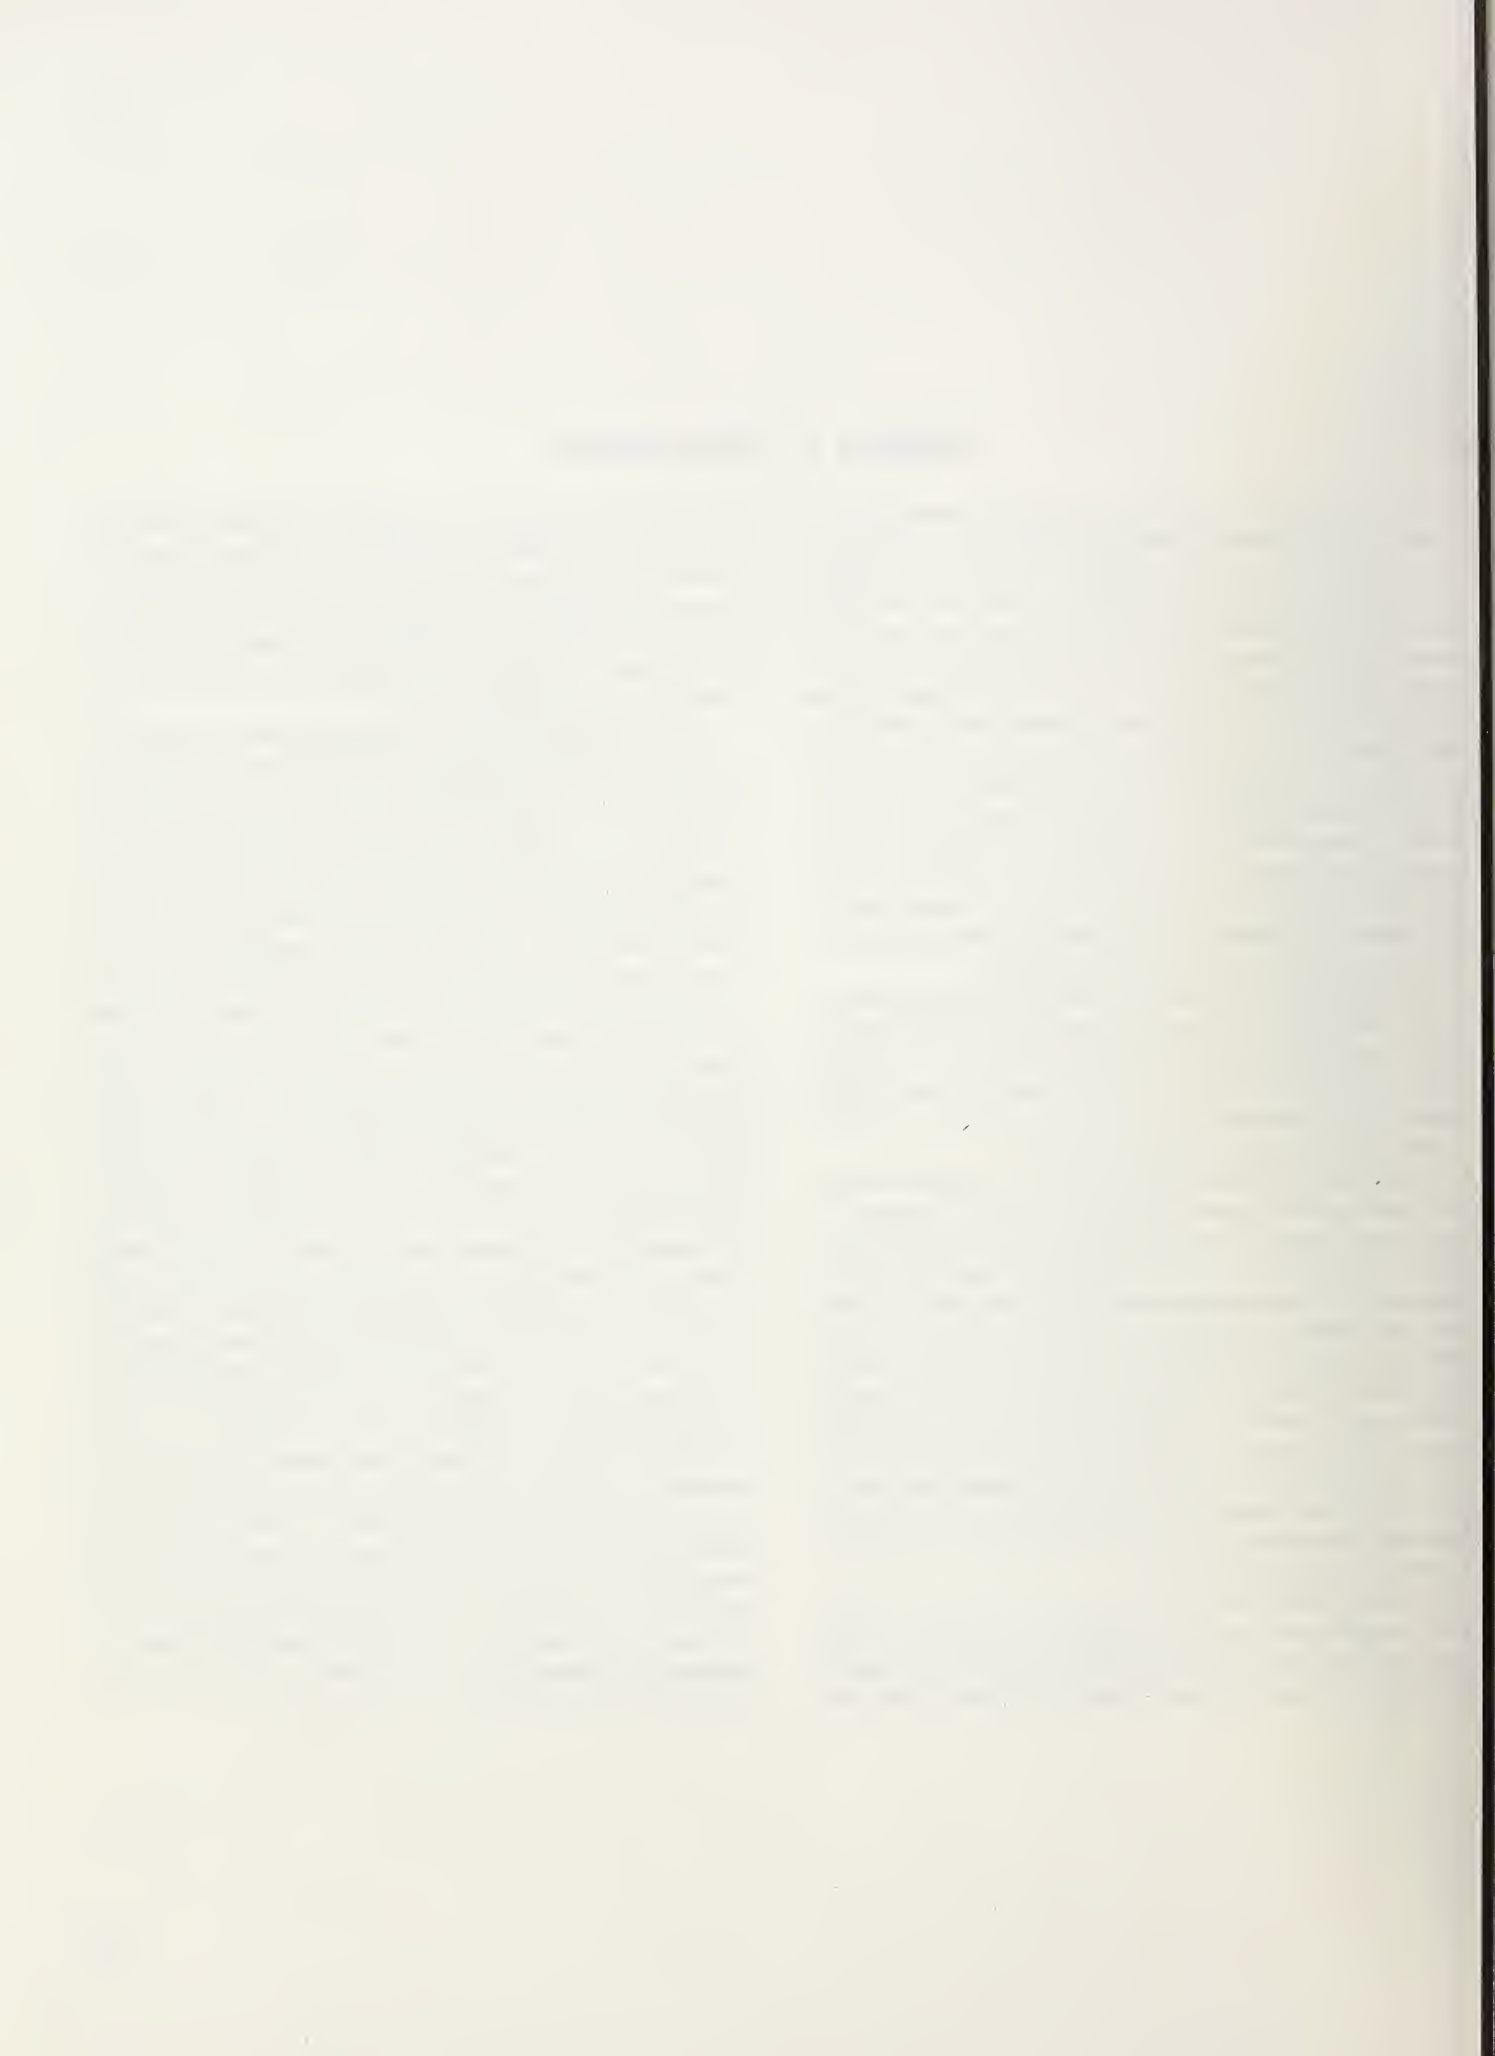

Government uses the foreign trade statistics in developing the merchandise trade figures in balance of payments accounts: to appraise and analyze major movements and trends (commodity and geographic) in international trade; to evaluate and plan such programs as the export expansion program, agricultural development and assistance programs, and programs under the Foreign Assistance Act and the Merchant Marine Act; and to measure the impact of tariff and trade concessions under the General Agreement on Tariffs and Trade (GATT) and the Generalized System of Preferences (GSP). The foreign trade data are also used extensively as the statistical base to implement and analyze operations under various international agreements, such as the Multi-Fiber Agreement (MFA), the U.S.-Canadian Automotive Products Trade Agreement, etc.

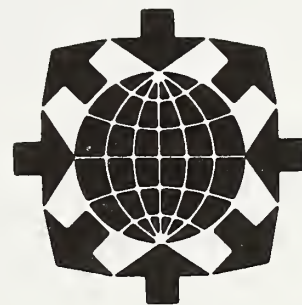

Nongovernment users in industry, finance, research institutions, transportation, and other fields, use the foreign trade data to appraise the general trade situation and outlook; in share-of-the-market analyses and market penetration studies; in product

and market development; for measuring the impact of competition; and, in general, as one of the statistical bases for determining marketing policies. The transportation industry—in particular vessel and air—makes extensive use of the data not only in market-share and penetration analyses but also in the critical area of anticipating the need for and design of future facilities and equipment.

To satisfy this broad range of needs and uses, the outputs of the foreign trade statistics program are presented at various summary and detailed levels. For example, for the general economic and/or financial analyst and others interested in broad movements and trends in U.S. foreign trade, there is a publication entitled *Highlights of U.S. Export and Import Trade* (FT 990) which presents monthly and cumulative data inter-related in terms of commodity groupings, geographic areas, and major movements in U.S. foreign trade. Publications such as the FT 410 and FT 135 reports show monthly and cumulative data on exports and imports respectively, in commodity-by-country detail. Other reports present these data in world area and country arrangement as well as by method of transportation for vessel and air. A series of reference tabulations, available to the public, present data in even further detail, showing such items as type of transaction, dutiable value and calculated duty for imports; Customs district of entry (and unloading) for imports and exportation for exports; type of service (e.g., liner, tanker, irregular) for waterborne trade; U.S. versus foreign flag carriers for vessel and air data, etc. Complete information on all publications and tabulations, including samples of all tables contained therein are presented in this Guide to Foreign Trade Statistics.

The material in this Guide reflects any changes made in the foreign trade statistical program since the release of the 1979 issue of the Guide. The reports and tabulations listed herein represent current plans for the release of foreign trade statistical data during 1983. In view of the dynamic nature of the foreign trade statistics program and the desire to keep this program responsive to the varying needs of users, it is always possible that additional changes in the program may be required. As in the past, any changes of a substantial nature affecting the coverage or presentation of the statistics will be announced in the appropriate publications.

Chapter II. Description of the Foreign Trade Statistics Program

IMPORT STATISTICS

Coverage

The import statistics reflect both government and non-government imports of merchandise including nonmonetary gold and silver, from foreign countries into U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory (includes the 50 States, the District of Columbia, and Puerto Rico), without regard to whether or not a commercial transaction is involved. In general, the statistics record the physical movement of merchandise into the United States from foreign countries, with the exception of the following types of transactions which are excluded from the statistics:

1. Merchandise shipped in transit through the United States, when documented with Customs as an intransit movement.
2. Imports from foreign countries into outlying U.S. possessions, i.e., Guam, American Samoa, Midway Island, Wake Island, and Canton and Enderbury Islands and trade between any of these outlying areas.
3. Shipments between the United States and Puerto Rico, between the United States, including Puerto Rico, and the Virgin Islands, Guam, American Samoa and other U.S. possessions. (See section on Trade of Outlying Areas of the United States for availability of separate statistics on U.S. trade with Puerto Rico, Virgin Islands and other U.S. possessions).
4. U.S. merchandise returned by U.S. Armed Forces for their own use.
5. Issued monetary coins of all component metals.
6. Some other transactions not considered to be of statistical significance, such as personal and household effects of travelers, temporary imports, low-valued nondutiable imports by mail, etc.

For further information with regard to coverage, see the sections on "Import Monthly Carryover" and "Sources of Error in the Import Statistics" which appear later in this chapter.

Source of Import Information

The official U.S. import statistics are compiled by the Bureau of the Census from copies of various Customs import forms in-

cluding the import entry, warehouse withdrawal and foreign trade zone forms which importers are required by law to file with Customs officials. The information as to country of origin, net quantity, value, and commodity classification is verified by Customs officials on entries filed for transactions valued over \$250, which are ordinarily subject to examination for Customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements.

General Imports/Imports for Consumption

Imported merchandise is reported in two statistical series: "General Imports" and "Imports for Consumption" (often called "special imports" by other countries).

General imports are a combination of entries for immediate consumption, entries into Customs bonded warehouses, and entries into U.S. Foreign Trade Zones. With certain exceptions as indicated above, these data generally reflect total arrivals of merchandise, whether such merchandise enters consumption channels immediately or is entered into warehouses or U.S. Foreign Trade Zones under Customs' custody to be subsequently withdrawn for consumption or withdrawn for exportation.

Imports for consumption are a combination of entries for immediate consumption, including those from U.S. Foreign Trade Zones and withdrawals from warehouses for consumption.¹ With certain exceptions as indicated above, these data generally reflect the total of commodities entered into U.S. consumption channels.

For statistical purposes, imports are classified by the type of transaction, for which "Types of Imports" codes are shown in some of the import reports or machine tabulations. General imports are a combination of types 1, 3, and 5, as indicated below, while imports for consumption are a combination of types 1, 2, and 5.

Type 1. Merchandise entered for immediate consumption.¹

¹ The terms "entered for immediate consumption" and "withdrawn from warehouse for consumption" are taken from the language used in handling the transactions through Customs and are sometimes misleading in their implication that the merchandise is immediately assimilated by being processed, merchandised, or consumed. Although all Customs barriers to such assimilation have been removed, merchandise for "immediate consumption" may, in fact, be warehoused by the importer outside of Customs custody. In the case of withdrawals for "consumption," although duties have been paid and the goods released from Customs control, they may remain in storage for a further period of time. Any of this "for consumption" merchandise, of course, could conceivably be exported subsequently to its release from Customs custody, and thus never enter actual U.S. consumption channels. For these reasons the term "imports for consumption" is somewhat inappropriate to describe the statistical series. Many countries use the term "special imports" to designate statistics compiled on this basis.

- Type 2. Merchandise withdrawn from bonded storage warehouses for consumption, withdrawn from bonded smelting and refining warehouses for consumption, and withdrawn from U.S. Foreign Trade Zones and entered into U.S. Customs territory for consumption.
- Type 3. Merchandise entered into bonded storage warehouses, entered into bonded smelting and refining warehouses and merchandise imported into U.S. Foreign Trade Zones.
- Type 4. Merchandise withdrawn from bonded storage warehouses for exportation (compilation of statistics discontinued effective March 1958).
- Type 5. Merchandise entered into bonded manufacturing warehouses for processing and subsequent export of the main product.
- Type 6. Discontinued effective January 1980. Prior to January 1980, type 6's covered merchandise imported into U.S. Foreign Trade Zones as "privileged" merchandise.² U.S. Foreign Trade Zone transactions are now covered under the foregoing definitions for types 1, 2, and 3.

Import Monthly Carryover

Effective February 1983, the definition of statistical month for imports has been changed. The month of importation for import statistics will reflect the month in which the U.S. Customs Services releases the merchandise to the importer. From January 1978 through January 1983, the month of importation was based on the date on which the importing carrier arrived in the United States. Prior to January 1978, the date of Customs official acceptance of the import documents was used to determine the month of importation.

Under the new definition of statistical month, a small carry-over will continue to exist. A number of factors account for this. Filing of documents may be delayed under the Customs procedure which allows importers to file the import entry summary up to 10 workdays after the date of release of the merchandise. Delay also may be caused by late transmittal of the import documents to the Census Bureau. In some instances, processing problems such as the rejection of a shipment by the computer because the data failed to meet certain edit criteria established to protect the accuracy of the statistics may occur. These limitations should be considered when making month-to-month comparisons.

Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month

changes in imports, exports, and similar series often reflect primarily irregular movements, e.g., exogenous events such as strikes, differences in monthly carryover, etc.

Import Valuation

Effective January 1982, the foreign trade reports present import data in terms of Customs value and c.i.f. (cost, insurance, and freight) value. Prior to January, 1982, import data were reported in terms of Customs, f.a.s. (free alongside ship) and c.i.f. values. Information is also compiled on the charges incurred in bringing imported merchandise to the United States.

Customs Import Value. The value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended (most recently by the Trade Act of 1979), is referred to as the Customs value. This Customs value, as amended by the Trade Agreements Act of 1979, is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. In the case of transactions between related parties, the relationship between buyer and seller should not influence the Customs value.

In the case of overland shipments originating in Canada only, the Customs value generally does not include costs incurred in bringing the merchandise from the point of origin to the Canadian border point.

C.i.f. Import Value. The c.i.f. value consists of the Customs value as defined above, plus all freight, insurance, and other charges (excluding U.S. import duties) incurred in bringing the merchandise from the country of exportation to the first port of arrival in the United States. Prior to January, 1982 statistics, such costs and charges were added to the arms-length value in order to compile the c.i.f. value.

F.a.s. Import Value. The Customs value, as defined above, has been substituted for the f.a.s. value. Prior to January 1982, the f.a.s. value was defined as the transaction value of imports at the foreign port of exportation. In the case of overland shipments from Canada, the f.a.s. value included costs incurred in bringing the merchandise from the point of origin to the Canadian border point.

In those instances where assistance was furnished to a foreign manufacturer for use in producing an article which is imported into the United States, the value of the assistance is required to be included in the Customs value reported for the merchandise. Such "assists" include both tangible and intangible assistance, such as, machinery, tools, dies and molds, blue prints, copyrights, research and development, and engineering and consulting services. Therefore, unit values for some imports, if derived by using the Customs value, may be substantially increased due to the inclusion of such "assists."

² "Privileged status" for foreign merchandise in a foreign trade zone means that the tariff classification for duty purposes and the amount of duty are determined on the basis of the classification of the merchandise and the duties applicable when the warehouse entry is filed. This classification and amount of duty apply to the merchandise if it is brought into the Customs territory at a later date, even though the rate of duty or the merchandise itself may have been changed in the meantime.

Import Charges

The import charges represent the aggregate cost of all freight, insurance, and other charges, but not including U.S. import duties, incurred in bringing the merchandise from alongside the carrier at the port of exportation in the country of exportation and placing it alongside the carrier at the first port of entry in the United States. In the case of overland shipments originating in Canada or Mexico, such costs, if any, are not required to be reported.

Dutiable Value and Calculated Duty

The information for "dutiable value" represents, in general, the Customs value of foreign merchandise imported into the United States which is subject to duty. The data for "Calculated duty" represents the estimated import duties collected under rates established by the Tariff Act of 1930 as amended by the Tariff Classification Act of 1962, the Trade Agreements Act of 1979, Public Laws, and Presidential Proclamations. Such estimated data are developed by computer to reflect, generally, the applicable rate(s) of duty as shown in the Tariff Schedules of the United States Annotated. However, these estimates do not necessarily reflect the actual amounts of duty paid and should, therefore, be used with caution. (The figures for dutiable value and calculated duty, for instance, may be somewhat overstated as a result of the inclusion in the figures of some U.S. products returned after processing or assembly abroad which are eligible for duty free consideration under TSUSA numbers 806.3000 and 807.0000. Separate, more detailed data for such imports are shown in tabulation IM 145 A.

Commodity Information

The basic import data are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA). In reports such as FT 135 and IM 150 and IM 155, the TSUSA data are presented in terms of a rearranged commodity classification system—Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification (SITC), Revision 2.³ Schedule A was constructed by the Bureau of the Census in order to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 3,000 commodity groupings which are meaningful in terms of commodities important in the U.S. import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

The foreign trade statistics program includes monthly and annual import data in terms of both Schedule A and TSUSA classifications. In addition, annual data in terms of classifications based on the Standard Industrial Classification (SIC) are also released. This rearrangement of the import data into a structure related to the origin of production is issued as soon as possible after the compilation of the original annual import data. Information regarding the SIC-based import product

classifications is contained in report FT 210 which presents import data in SIC-based product classification by area-of-origin arrangement. Additional data in terms of the SIC-based classifications are contained in tabulation IA 276.

Information on imports of commodities classified on the basis of "end use" is contained in machine tabulation IM 171. These data are available for reference use at principal locations.

Information to assist users in correlating the various classification systems used in compiling foreign trade statistics, such as, correlating TSUSA classifications with Schedule A, agricultural/nonagricultural and end-use classifications, is contained in the publication, "U.S. Foreign Trade Statistics Classifications and Cross-Classifications" (1980 edition). Further information regarding classifications may be obtained from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

Country and Area of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

In foreign trade reports and tabulations, countries for which data are presented are listed in Schedule C-I, Classification of Country and Territory Designations for U.S. Import Statistics, which shows complete country names together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Countries are listed in sequence within continents generally from north to south and west to east. Schedule C-I is published as Annex B in Tariff Schedules of the United States Annotated. A separate edition of Schedule C-I is also available free upon request to the Bureau of the Census.

The major world areas for which foreign trade data are shown represent groupings of individual Schedule C-I countries with the exceptions of Canada, the United Kingdom, Japan, and the Federal Republic of Germany, each of which is treated as a separate area. A list showing the major world areas and the individual countries included in each area appears in the annual reports FT 150 and FT155. Effective August 1982, the country designation UNIDENT represents the total for countries from which imports valued less than \$251 are so infrequent that it is not possible to accurately estimate value by country for these shipments. Prior to August 1982, the country designation UNIDENT was used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-value shipments.

Customs District for Imports

For imports by all methods of transportation combined, merchandise is shown as imported into the Customs district of entry, i.e., the district in which the merchandise is cleared through Customs for entry into consumption channels or entered into Customs warehouses. In either case, this may not be the district at which the merchandise arrived in the United

³ United Nations Statistical Papers, Series M, No. 34/Rev. 2.

States nor its final place of destination. When separate data are shown for imports by vessel and air, the Customs district shown is the district of unloading, i.e., the district at which the merchandise is unloaded from the importing vessel or aircraft. The district of unloading may not be the same as the district of entry. Imports by mail are credited to the district in which the import entry is filed. Imports credited to interior districts represent imports by air or imports leaving Customs custody in such districts after having been transported in Customs bond from a border point or seaport.

The names and codes of the Customs districts and ports are listed in Schedule D, Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics. Imports of vessels moving under their own power or afloat are included under a single code (District 60) and are not reported by individual Customs district of entry. Also, estimates for shipments valued \$250 and under are reported under a single code (District 70). Schedule D is published as Statistical Annex A in TSUSA. Copies of Schedule D may also be obtained free of charge from the Bureau of the Census.

Estimated Data for Imports Valued Under \$251

The import statistics include estimated value data for shipments valued under \$251 reported on both formal and informal entries. (Informal entries generally contain items valued not more than \$250.) Effective August 1982, value data for shipments valued under \$251 are estimated from factors based on the ratios of under-\$251 shipments to individual country totals. Prior to August 1982, estimates were based on a 1-percent sample of documents for shipments valued under \$251. The estimates for shipments valued under \$251 are (1) shown under Schedule A numbers 990.000, 990.0, and 99 and included in the section 9 total and (2) shown under TSUSA numbers 999.9500 and 999.9 and included with other items in the totals for codes 999 and 99, and the Schedule 9 total. These estimates are excluded from the other commodity codes. However, these estimates for low-valued shipments are included in the country, continent, and area totals and the total for U.S. imports. (The estimates for low-valued shipments do not reflect any imports by mail of duty-free merchandise valued under \$251, for which import entries are not required to be filed.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. The total value so excluded generally amounts to less than one-half of 1 percent of the monthly import total. Although subject to considerable variability, particularly where the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual areas or countries.

Sources of Error in the Import Statistics

Monthly import figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, net quantity, value and other statistical

factors, month of inclusion (see the explanation regarding Import Monthly Carryover, above), and errors which may result from the estimating of shipments valued under \$251. As indicated above and under Source of Import Information, the information as to net quantity, value, commodity classification, and country of origin is verified by Customs officials on entries filed for transactions valued over \$250 which are ordinarily subject to examination for Customs appraisal purposes, thus considerably reducing the possibility of error. In addition, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the statistics to the fullest practicable extent.

Unit Control

For some commodities, TSUSA requires that quantity information be reported in more than one unit, with value information reported with only one of the units. In tabulations which contain a unit control code column, the code zero is used (or column may be blank) for the unit with which value is reported, while the code 2 is used for the unit with which value information is not reported.

Economic Class and Economic Class Aggregate Codes

Following is a list of the economic class and economic class aggregate codes used in the reports and tabulations containing such data.

Economic class codes:

- 0—agricultural crude materials
- 1—nonagricultural crude materials
- 2—agricultural crude foodstuffs
- 3—nonagricultural crude foodstuffs
- 4—agricultural manufactured foodstuffs and beverages
- 5—nonagricultural manufactured foodstuffs and beverages
- 6—agricultural semimanufactures
- 7—nonagricultural semimanufactures
- 8—agricultural finished manufactures
- 9—nonagricultural finished manufactures

Economic class aggregate codes (totals for the economic class codes given above):

- 1—crude materials (economic class codes 0 and 1)
- 2—crude foodstuffs (economic class codes 2 and 3)
- 3—manufactured foodstuffs and beverages (economic class codes 4 and 5)
- 4—semimanufactures (economic class codes 6 and 7)
- 5—finished manufactures (economic class codes 8 and 9)

Types of Duty (Rate Provision) Codes

The following codes, which appear in some of the import tabulations, indicate the free or dutiable status of merchandise imported into the United States.

Free Items:

- 10—Free under specific provisions for free status prescribed

in duty columns of TSUSA Schedules 1 to 7, inclusive; or free under certain special classification provisions in Schedule 8 except those referred to, by item number, elsewhere in this list of rate provision codes.

11—Effective January 1, 1981, indicates that no duty is calculated for articles entered into the U.S. Virgin Islands from foreign countries. Prior to January 1, 1981, this rate provision indicated free entry into the United States of "Philippine Articles."

12—Effective with January 1980 statistics, free as the products of Least Developed Developing Countries (LDDC) when free status is prescribed in the column entitled "LDDC" of TSUSA Schedules 1 to 7, inclusive. (Prior to 1962, used to indicate free status for "Products of Cuba.")

13—Free as articles to be processed under bond for exportation, including processes which result in articles manufactured or produced in the United States (see item 864.05 of TSUSA); or free for manufacture in bonded warehouse and export (Sec. 311, Tariff Act of 1930 and Sec. 312 as amended by Sec. 301(b) of the Tariff Classification Act of 1962).

14—Free as supplies for certain vessels and aircraft (Sec. 309, Tariff Act of 1930 and Sec. 10.59, Customs Regulations). Includes equipment and repairs to vessels if duty remitted.

16—Free as articles of the United States government which otherwise would be dutiable under specific provisions in TSUSA Schedules 1 to 7, inclusive, were it not for the following provisions for free entry in TSUSA Schedule 8, Part 3, Subpart A:

Articles for military departments (TSUSA item 832.00)

Articles for General Services Administration (TSUSA item 833.00)

Articles for the Atomic Energy Commission (TSUSA item 834.00)

Articles for the Commodity Credit Corporation (TSUSA item 836.00)

17—Free as articles entered under the Educational, Scientific, and Cultural Materials Importation Act of 1982. (See part 4 of the Appendix to the Tariff Schedules of the United States Annotated (TSUSA).)

18—Free under provisions established by legislation, Presidential Proclamation, or administrative action not covered by a more specific free rate provision. Free items specified in Part 1, of the appendix to TSUSA and articles claiming free entry under the Generalized System of Preferences (GSP) are assigned rate provision code 18.

Dutiable Items:

Dutiable at rates prescribed in column numbered 1 of TSUSA Schedules 1 to 7, inclusive (including column 1 minimum rates prescribed in headnotes to those schedules).

21. Specific rates	41. Compound rates
31. Ad valorem rates	51. Minimum rates

Dutiable at rates prescribed in column numbered 2 of TSUSA Schedules 1 to 7, inclusive (including column 2 minimum rates prescribed in headnotes to those Schedules).

22. Specific rates	42. Compound rates
32. Ad valorem rates	52. Minimum rates

Dutiable at rates prescribed in column numbered 1 of the Appendix to the Tariff Schedules in TSUSA when such rates differ from those prescribed for the specified item number in TSUSA Schedules 1 to 7, inclusive.

23. Specific rates	43. Compound rates
33. Ad valorem rates	

Dutiable at rates prescribed in column numbered 2 of the Appendix to the Tariff Schedules in TSUSA when such rates differ from those prescribed for the specified item number in TSUSA Schedules 1 to 7, inclusive.

24. Specific rates	44. Compound rates
34. Ad valorem rates	

Composite rates (average rates) for articles subject to various rates based on component parts.

26. Specific rates	46. Compound rates
36. Ad valorem rates	

Effective with January 1980 statistics, dutiable at rates prescribed in the column entitled "LDDC" of TSUSA Schedules 1 to 7, inclusive. (Formerly used to indicate duty status based on rates prescribed for "Products of Cuba.")

28. Specific rates	48. Compound rates
38. Ad valorem rates	58. Minimum rates

Dutiable at various rates or at special rates.

70.

EXPORT STATISTICS

Coverage

The export statistics reflect both government and non-government exports of domestic and foreign merchandise from U.S. Foreign Trade Zones, the U.S. Customs territory (includes the 50 States, the District of Columbia, and Puerto Rico) and the U.S. Virgin Islands to foreign countries, without regard to whether or not the exportation involves a commercial transaction.⁴ In general, the statistics record the physical movement of merchandise out of the United States to foreign countries, with the exception of the types of transactions listed below as excluded.

Excluded from the Statistics

1. Shipments from outlying U.S. possessions, i.e., Guam, American Samoa, Midway Island, Wake Island, and Canton and Enderbury Islands to foreign countries and trade between any of the outlying areas.
2. Shipments between the United States and Puerto Rico, between the United States, including Puerto Rico and the Virgin Islands, Guam, American Samoa and other U.S. possessions. (See section on Trade of Outlying Areas of the United States for availability of separate statistics on U.S. trade with Puerto Rico, Virgin Islands and other U.S. possessions).
3. Shipments to U.S. Armed Forces for their own use, including shipments to U.S. armed services post exchanges, etc., and a few other types of shipments for U.S. Government use which although not consigned to our Armed Forces, are similarly identified with activities carried on for the direct benefit of the U.S. Government. For example, the following are excluded:
 - a. Shipments of office furniture, equipment, and supplies for the use of U.S. Government offices.
 - b. Shipments of food, medicines and related items, and other commissary supplies to U.S. Government offices or employees for their own use.
 - c. Shipments for the construction and maintenance of U.S. satellite tracking stations in foreign countries.
 - d. Shipments in connection with U.S. Antarctic Research Program.
4. Merchandise shipped in transit through the United States from one foreign country to another, when documented as such with U.S. Customs.
5. Issued monetary coins of all component metals.

⁴ Since it is the movement of merchandise out of the United States which is being measured, the statistics do not, of course, include U.S.-owned or/-financed goods moving directly from one foreign country to another.

6. Bunker fuels and other supplies and equipment for use on departing vessels, planes, or other carriers engaged in foreign trade. (Information on bunker fuels laden on board departing vessels engaged in foreign trade is published by the Census Bureau in report FT 810.)

7. Electrical energy.

8. Some other transactions not considered to be of statistical importance, such as shipments of personal and household effects of travelers, temporary exports, merchandise for the personal use of U.S. Government employees abroad, low-valued or noncommercial exports by mail, etc.

Included in the Statistics

The following are examples of some of the types of shipments which are included in the statistics but which arise other than from strictly commercial sales of merchandise, or which are of such a nature that a question as to whether they are included might arise. Except for certain types of gold and silver shipments and some goods donated for relief and charity by individuals and private agencies, these shipments are not separately identified in this report:

1. Effective with the January 1978 statistics, exports of nonmonetary gold (in such forms as ore, scrap, base bullion, refined bullion, etc.) which were previously excluded, are included in the regular export statistics. Exports of silver in the above-mentioned forms have been included since January 1969. (Separate data on gold shipments were published in report FT 2402 through December 1974 and in report FT 990 from January 1975-December 1977. For additional information regarding the inclusion of gold in the statistics, see the Special Announcement in the January 1978 issue of report FT 410 or report FT 990.)
2. Department of Defense Military Assistance Program Grant-Aid shipments under the Foreign Assistance Act. (Separate totals for merchandise exported under this program are shown in the monthly Census Bureau reports FT 900 and FT 990.)
3. Shipments of commodities for economic assistance under the Foreign Assistance Act. (Totals for exports under this program are presented in the March, June, September, and December issues of report FT 990.)
4. Shipments of agricultural commodities⁵ under P.L. 480 (Agricultural Trade Development and Assistance Act of 1954) as amended, and related laws. These laws provide for exports of agricultural commodities under various special U.S. Government arrangements, including: dollar credit sales to foreign governments or private trade entities; convertible local currency credit sales; donations of agricultural commodities exported in conjunction with cooperating sponsors, including friendly governments operating under bilateral agreements with the United States, nonprofit voluntary U.S.

⁵ Agricultural commodities (exports and imports) consists of non-marine food products and other products of agriculture which have not passed through complex processes of manufacture.

relief agencies, international organizations, and the World Food Program; and the Food for Development Program. (Exports by nonprofit voluntary relief agencies including, without separate identification, their exports under P.L. 480, are reported under Schedule B numbers specifically provided for such exports. Quarterly value totals for exports under P.L. 480 are presented in the March, June, September, and December issues of report FT 990. Additional information on exports under P.L. 480 and related laws may be obtained from the Economic Research Service of the Department of Agriculture.)

5. All other types of U.S. Government shipments not described above as excluded.
6. Intracompany shipments—that is, shipments of merchandise by a company in the United States to a branch, affiliate, or parent of the same company in a foreign country.
7. Purchases made in the United States by representatives of foreign countries for foreign governments or firms, exported by the representative to his own or a third country.
8. Sales of U.S. vessels to purchasers in foreign countries.

For further information with regard to coverage see the sections on "Export Monthly Carryover" and "Sources of Error in the Export Statistics" which appear later in this chapter.

Source of Export Information

The official U.S. export statistics are compiled by the Bureau of the Census primarily from copies of Shipper's Export Declarations which are required to be filed with Customs officials, except for Department of Defense Military Assistance Program Grant-Aid shipments which are reported directly to the Bureau of the Census by the Department of Defense and shipments by qualified exporters who have been authorized to submit data in the form of magnetic tape, punched cards, or monthly Shipper's Summary Export Declarations directly to the Bureau of the Census.

Definition of Exports of Domestic and Foreign Merchandise

Exports of domestic merchandise include commodities which are grown, produced, or manufactured in the United States, and commodities of foreign origin which have been changed in the United States including U.S. Foreign Trade Zones, from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Sugar refined in this country from imported raw sugar, flour ground from imported wheat, and ores or metal smelted or refined from imported ores or metal, are examples of commodities considered to be domestic for statistical purposes when exported to a foreign country. Also, when material or parts of foreign origin are imported into the United States and incorporated with material or parts produced in the United States, the complete product is considered to be a domestic product and

the imported parts lose their identity as foreign merchandise. Exports of foreign merchandise consist of commodities of foreign origin which have entered the United States as imports or have entered U.S. Foreign Trade Zones, and which, at the time of exportation, are in substantially the same condition as when imported.

Export Monthly Carryover

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of exportation. For purposes of the statistics, the month of exportation is generally based on the date when the shipment leaves the United States. (For vessel or air shipments, it is the date when the carrier departs or is cleared from the port of export.) However, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is a small carryover (in terms of value) of the shipments from the actual month of exportations to a subsequent month, usually the succeeding month. These limitations should be borne in mind when making month-to-month comparisons.

Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in imports, exports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc.

Valuation

F.a.s. Export Value. The value reported in the export statistics generally is equivalent to the f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value, as defined, excludes the cost of loading the merchandise aboard the exporting carrier and also excludes freight, insurance, and any other charges or transportation costs beyond the port of exportation. However, it is recognized that the statistics may not always reflect the value as defined above, as exporters sometimes find it difficult to assign a value in accordance with this definition. For example, the export value for a rail or truck shipment from an interior U.S. point to an interior point in Canada or Mexico should include freight and other charges to, but not beyond, the border port of exportation. In some instances, however, the value reported by the shipper may completely exclude such charges (particularly where the usual price quotation is f.o.b. an interior U.S. point) or, on the other hand, may reflect the cost of delivering the merchandise to the foreign place of destination. For vessel or air shipments, the value reported on the declaration may include ocean or air freight and insurance charges beyond the port of export, which should not be included. For certain types of transactions the export value may be difficult to determine, as in the case of shipments from a business concern to its own subsidiary or affiliate abroad. The extent to which the statistics reflect the stated value definition depends largely upon the accuracy of reporting by shippers on their export declarations.

Commodity Information

The basic export statistics are initially collected and compiled in accordance with the commodity classifications in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. Effective with the January 1978 edition of Schedule B, the export classification schedule is based on the framework of the import classification system in the Tariff Schedules of the United States (TSUS). For the presentation of data in various statistical reports effective January 1978, the Schedule B classifications have been converted, on a one-for-one basis, to a new classification system—Schedule E, SITC Based Classification of Domestic and Foreign Commodities Exported from the United States, which is based on the Standard International Trade Classification (SITC), Revision 2.⁶ (Prior to January 1978, the export statistics were presented only in terms of Schedule B classifications, which were based on the former SITC, revised.) The compilation of export data in terms of classifications related to the SITC (i.e., Schedule E) permits comparison of U.S. export statistics, insofar as possible, with the foreign trade statistics compiled by other trading nations.

The numbering system of Schedule E is basically the same as the SITC. Whenever Schedule E one-, two-, or three-digit numbers are the same as those in the SITC, it is believed that for most statistical purposes the commodity coverage can be considered essentially comparable, although the coverage is not always identical. Reasonable comparability for statistical purposes can also be expected, in most cases, when five-digit Schedule E numbers are identical with SITC numbers. At the four-digit level, the retention of an SITC number in Schedule E indicates similarity of coverage but the degree of comparability may in some cases be less at the four-digit level for identical numbers in the two systems than at the five-digit level. When a non-SITC number is used as the second, third, fourth, or fifth digit of a Schedule E number, comparability of coverage with any given SITC classification at the same level ordinarily does not exist, but there usually will be comparability involving combinations of Schedule E or SITC classifications.

Some of the commodity descriptions used in foreign trade reports and tabulations are necessarily abbreviated to save printing costs and therefore, in many cases, they do not contain all the qualifying information necessary to define completely the commodity for which statistics are shown. For complete definition of the individual Schedule E commodity classifications, reference should be made to the comparable commodity classification in Schedule B. As indicated above, the Schedule B classifications were converted to Schedule E classifications on a one-for-one basis. Information to assist users in correlating the various classification systems used in compiling foreign trade statistics, such as, correlating Schedule B classifications with Schedule E, agricultural/nonagricultural and end-use classifications, is contained in the publications "U.S. Foreign Trade Statistics Classifications and Cross-Classifications" (1980 edition). Further information regarding classifications may be obtained from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

Information on individual export shipments valued under \$501 (effective with the statistics for March 1979, under \$251 prior to March 1979) is reported under Schedule B number 818.9000 or Schedule E number 990.0000 without classification by commodity. Value information for such shipments is estimated each month on the basis of established percentages of the individual country totals. The statistics for commodity classifications other than those indicated above are undercounted to the extent that such low-valued shipments of the commodity are made.

In addition to monthly and annual export data for Schedule B classifications, annual data in terms of classifications based on the Standard Industrial Classification (SIC) are also released. This rearrangement of the export data into a structure related to the origin of production is issued each year as soon as possible after the compilation of the original annual export data. Information regarding the SIC-based export product classifications is contained in report FT 610 which presents export data in SIC-based product classification by area of destination arrangement. Additional data in terms of the SIC-based classifications are contained in tabulation EA 676.

Information on exports of commodities classified on the basis of "end-use" is contained in machine tabulation EM 571. These data are available for reference use at Department of Commerce field offices or Custom Service offices in principal cities.

The publication entitled "U.S. Foreign Trade Statistics Classifications and Cross-Classifications" brings together the basic schedules of commodity classifications currently being used in the compilation and publication of U.S. export and import statistics. For example, Schedule B classifications and their respective correlations to the categories comprising FT 990 codes and end-use classifications, as well as similar classifications and cross-classifications relating to the import statistics, are included.

Country and Area of Destination

The country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. If the shipper does not know the country of ultimate destination, the shipment is credited to the last country to which the shipper knows that the merchandise will be shipped in the same form as when exported. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment countries such as Hong Kong, Belgium, Netherlands, etc., and undercounted for other countries.

Countries and territories for which export data are compiled are listed in Schedule C-E, Classification of Country and Territory Designations for U.S. Export Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Country names that are abbreviated in the statistical reports to save space are shown in full in Schedule C-E. Copies of Schedule C-E are available free upon request to the Bureau of the Census.

The major world areas for which foreign trade data are shown represent groupings of individual Schedule C-E countries with the exceptions of Canada, the United Kingdom, Japan,

⁶ United Nations Statistical Papers, Series M, No. 34/Rev. 2.

and the Federal Republic of Germany, which are treated as separate areas.

Customs District for Exports

Export shipments are credited statistically to the Customs district through which the shipment clears when it leaves the United States. Therefore, the Customs district shown in the statistics is not necessarily the district in which the merchandise was grown, manufactured, or otherwise originated.

Exports are credited to Customs districts as follows:

1. For exports by vessel or air, the shipments are credited to the Customs district in which the merchandise is loaded on the vessel or aircraft which takes the merchandise out of the country.
2. For exports by rail, truck, or pipeline, the shipments are credited to the Customs district through which the merchandise crosses the U.S. border into foreign territory.
3. Aircraft exported under their own power are credited to the Customs district from which they are flown out of the United States.

The names and codes of the Customs districts and ports are listed in Schedule D, Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics. All mail shipments are credited to one special district (District 80) and are not reported according to the geographical location of the post office from which the merchandise was mailed nor the Customs district from which the mail leaves the United States. Likewise, vessels moving under their own power or afloat are reported under District 60 and shipments individually valued under \$501 (effective with the March 1979 statistics, under \$251 prior to that) are reported under District 70. Schedule D is published as a part of Schedule B. Copies of Schedule D may be obtained from the Bureau of the Census.

Security Restrictions

For certain commodities, referred to as Special Category commodities, security restrictions prevent the release of export information in as much detail as is released for other commodities. (Copies of a list of the Special Category commodities may be obtained from the Bureau of the Census.) For each seven-digit Schedule B number which is classified as a Special Category commodity, data showing total U.S. exports of the commodity to all countries combined are released, without area, continent, country of destination, Customs district of exportation, or other detail shown for the commodity. Exports of Special Category commodities are included in total export figures, and in Schedule B or E section, division, group, and subgroup commodity totals, without area, continent, country, or other detail shown for the Special Category commodities. Special Category shipments are also included in area and continent totals, and in the totals for individual countries. However, Special Category shipments are not included in individual Customs region or district totals. In reports showing data by method of transportation, the detailed vessel and air

statistics (such as those shown in commodity, area, continent, or country arrangement) also exclude Special Category shipments.

Estimated Data for Export Shipments Valued Under \$2,000 to Canada

For countries other than Canada, effective July 1981, data for shipments valued over \$500 are fully compiled. Prior to July 1981, these data were fully compiled only for shipments valued \$1,000 and over while shipments valued \$501-\$999 were estimated, based on a 50 percent sample. For Canada, effective with the March 1979 statistics, shipments valued \$501-\$1,999 (\$251-\$1,999 prior to March 1979) are estimated, based on a 10-percent sample and are combined with fully compiled data for shipments valued \$2,000 and over. For exports to all countries, data for shipments valued under \$501 (under \$251 prior to March 1979) are omitted from the statistics shown for the detailed commodity classifications, but value data for such shipments, estimated each month from factors⁷ based on established percentages of individual country totals, are shown under the special Schedule B commodity number 818.9000 and under the special Schedule E commodity number 990.0000. The \$501-\$1,999 shipments to Canada represents about 1 percent of the total value of exports, as do the under-\$501 shipments.

Details regarding the sampling and estimating procedures for shipments to Canada and other countries are contained in report FT 410 and other publications. Information is also given regarding the effect of the estimating procedures on the reliability of the data.

Sources of Error in the Export Statistics

Export figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, net quantity, value and other statistical factors, month of inclusion (see paragraph on monthly carryover, above), and errors which may result from the sampling of certain export shipments. (See the explanation of sampling procedures elsewhere in this explanation.) For exports to Canada, the statistics are undercounted due to the nonreceipt of some Shipper's Export Declarations. In order to minimize errors, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the data to the fullest practicable extent.

STATISTICS ON TRADE BY METHOD OF TRANSPORTATION

Many of the current foreign trade reports and tabulations contain data on imports or exports by all methods of transportation combined, with separate data for vessel and air shipments, the methods of transportation by which the bulk of

⁷The factors are established by observation of the percentage relationship of the under-\$501 shipments to the individual country totals in past periods.

foreign trade shipments are imported into or exported from the United States (with the exception of trade with Canada and Mexico which moves primarily by rail or truck). In addition, summary reports and tabulations containing data exclusively on waterborne or airborne trade are also prepared. (For further information regarding specific reports and tabulations, see information Locators or Index.)

In using the statistics on trade by vessel, air, and all methods of transportation, it should be noted that there are some differences in the coverage of these statistics, primarily as follows:

1. The data for "all methods of transportation" include exports and imports by vessel, air, rail, truck, air mail, parcel post, and other methods of transportation. The data for vessel and air exports and imports represent waterborne and airborne shipments only (merchandise actually transported aboard a vessel or an aircraft.)
2. Imports and exports of (a) vessels moving under their own power or afloat and (b) aircraft flown into or out of the United States are included in the "all methods" data but excluded from the vessel and air statistics.
3. Mail and parcel post shipments (including those transported by vessel or air) are included in the "all methods" data but excluded from the vessel and air statistics.
4. Exports of Special Category commodities, which are included in the "all methods" data (see Security Restrictions, above) are included in the overall totals for vessel value and air value and shipping weight, but not in the overall vessel shipping weight total or in any of the detailed vessel and air statistics.

The shipping weight figures shown for vessel and air shipments represent the gross weight of shipments, including the weight of moisture content, wrappings, crates, boxes, and containers (other than containers used for containerized cargo). Shipping weight information is required to be reported for shipments by vessel and air only.

The vessel and air statistics represent shipments which arrived in or departed from the United States by these methods of transportation. In some instances shipments from abroad arrive in Canada or Mexico by vessel or air and are then transhipped through those countries to the United States by rail or truck. In the U.S. import statistics, such shipments are not reported as vessel or air shipments but, of course, are included in the "all methods" statistics. Likewise, in the case of exports, if shipments are sent by rail or truck from the United States to Canada or Mexico for exportation by vessel or air to another country of destination, the shipments are not reported as vessel or air shipments but are included in the "all methods" statistics as exports to the country of ultimate destination.

DATA ADJUSTED FOR SEASONAL AND WORKING-DAY VARIATION

Monthly totals for exports and imports and the major commodity components (Schedule A and Schedule E section totals) are adjusted for seasonal and working-day variation. These

data are presented in reports FT 900 and FT 990. Effective with the release of the January 1979 statistics, the seasonally adjusted export and import totals represent the sum of commodity components adjusted for seasonal and working-day variation. Previously, the monthly totals for exports and imports were adjusted independently of the components. The procedure of aggregating seasonally adjusted commodity components more accurately reflects the seasonal movements within the totals. Under this procedure, only those section totals that show identifiable seasonal patterns are seasonally adjusted.

TRADE OF OUTLYING AREAS OF THE UNITED STATES

Coverage

The coverage of the statistics on U.S. trade with Puerto Rico and outlying U.S. areas is the same as the coverage of the statistics on U.S. trade with foreign countries, as explained in preceding sections of this explanation relating to import and export statistics.

The statistics on shipments from the United States to Puerto Rico and U.S. possessions show information by method of transportation, i.e. separate data are presented for movements by vessel and by air, the methods of transportation by which most shipments in this trade are made. For further information regarding the handling of "method of transportation" data, see the section above on "Statistics on Trade by Method of Transportation."

Statistics on trade between the United States and Puerto Rico and U.S. possessions are published in report FT 800, with additional data presented in machine tabulations. (See chapter V for information regarding tabulations.) Information on shipments from the United States to Midway Island, Wake Island, Guam, and Canton and Enderbury Islands is no longer being compiled by the Bureau of the Census as a result of the elimination of the requirement for filing Shipper's Export Declarations for such shipments, effective in March 1970.

Source of Information

Data on shipments from the United States to Puerto Rico and the Virgin Islands, and on shipments from Puerto Rico to the United States are compiled primarily from information furnished on Shipper's Export Declarations, which are required to be filed with Customs officials, except for shipments by qualified exporters who have been authorized to submit data in the form of magnetic tape, punched cards, or monthly Shipper's Summary Export Declarations directly to the Bureau of the Census. (Effective with the August 1976 statistics, data on shipments from the United States to American Samoa are no longer being compiled due to the elimination of the requirement for filing export declarations for such shipments.) Data on shipments from the Virgin Islands, Guam, and American Samoa to the United States are obtained from import documents, also filed with Customs officials. Information on shipments between the United States and other U.S. possessions are not compiled by the Bureau of the Census.

Valuation

The value reported in the statistics on shipments from the United States to Puerto Rico and the Virgin Islands, and shipments from Puerto Rico to the United States, (data compiled from export declarations) generally is equivalent to the f.a.s. (free alongside ship) value at the port of exportation, based on the transaction price, including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the port of exportation.

The value shown for shipments from the Virgin Islands, Guam, and American Samoa to the United States (compiled from import entries) is the value as appraised by the U.S. Customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended.

Commodity Information

Commodity data on shipments from the United States to Puerto Rico and the Virgin Islands are presented in terms of the seven-digit commodity classifications in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. Beginning January 1978, commodity data for shipments from Puerto Rico to the United States are likewise presented in terms of the seven-digit Schedule B commodity numbers. Prior to January 1978, these data were presented in terms of the five-digit classifications in Schedule P, Commodity Classification for Reporting Shipments from Puerto Rico to the United States (based on Schedule B), which was discontinued effective January 1978.

Estimated Data

Effective July 1981, data for shipments from the United States to Puerto Rico and the U.S. Virgin Islands and for shipments from Puerto Rico to the United States valued over \$500 are fully compiled. Prior to July 1981, these data were fully compiled only for shipments valued \$1,000 and over while shipments valued \$501-\$999 were estimated, based on a 50 percent sample.

Trade With Foreign Countries

The Virgin Islands of the United States are not a part of the U.S. Customs territory for the collection of duties, however, effective January 1, 1981, their trade with foreign countries is

included in the regular U.S. export and import statistics. Export declarations and import entries are filed with Customs officials in the Virgin Islands of the United States in the same manner as in the U.S. Customs territory. Prior to January 1, 1981, data on exports from the U.S. Virgin Islands to foreign countries were presented in tabulations EM 591 and EA 691. Tables presenting net quantity and value data on imports of petroleum and selected petroleum products into the U.S. Virgin Islands from foreign countries are included in monthly report FT 900.

Puerto Rico is a Customs district within the U.S. Customs territory, and its trade with foreign countries is included in the export and import statistics showing the trade of the United States with foreign countries. The statistics on trade of Puerto Rico with foreign countries represent exports and imports through the Puerto Rico Customs District and do not necessarily represent exports of commodities originating in Puerto Rico or imports of commodities for direct consumption in Puerto Rico. Statistics showing commodity detail for such trade are presented in machine tabulations IM 154 and EM 563.

Data on trade of other outlying areas with foreign countries are not included in reports or tabulations currently released by the Census Bureau.

Origin of Exports and Destination of Imports

The Census Bureau frequently receives inquiries regarding the possibility of obtaining information showing the place of origin for domestic merchandise exported from the United States and the place within the United States to which imported merchandise is destined. This information is not compiled as a part of the foreign trade statistics program.

In recognition of the need for this type of information, the Bureau of the Census conducted a survey on the Domestic and International Transportation of U.S. Foreign Trade: 1976, under the sponsorship of the U.S. Department of Transportation, and the St. Lawrence Seaway Development Corporation; the U.S. Army Corps of Engineers, Institute for Water Resources; and the U.S. Department of Commerce, Maritime Administration. The purpose of the survey was to collect information on the movement of 1976 exports and imports within the United States. A probability sample of individual export and import shipments was selected from the foreign trade data file and questionnaires sent to the exporters and importers of each shipment selected in the sample. The results of the survey were included in a report entitled "Domestic and

International Transportation of U.S. Foreign Trade: 1976, Part A Exports, Part B Imports". A similar, but less comprehensive survey was previously conducted covering 1970 data.

In addition, in a separate survey by the Bureau of the Census, 1981 Annual Survey of Manufactures, respondents were requested to report the value of their manufactured products shipped for export. The results of this aspect of the 1981 Annual Survey were released in a report entitled Annual Survey

of Manufactures: 1981—Origin of Exports of Manufactured Products M81(AS)-6. This report includes estimates of employment related to manufactured exports by State, and by Standard Industrial Classifications. Earlier surveys on this subject, covering 1980, 1977, and 1976 data were also conducted by the Bureau.

Similar reports will be compiled periodically for subsequent years. Notification will be made to the public when they become available.

Explanation of Symbols Used in This Publication:

FT - foreign trade publication
EM - export monthly tabulation
EA - export annual tabulation
IM - import monthly tabulation

IA - import annual tabulation
SA - shipping annual tabulation
SM - shipping monthly tabulation

Special Services Available

THE
LIBRARY
OF THE
CONGRESS

Chapter III. Special Services Available

In addition to the sources of data described herein, the Census Bureau provides a special service whereby users of the statistics may obtain information at an earlier date than the release of published reports or may obtain data in greater detail or in different arrangement than that available in the statistics which are regularly released. The entire cost of the special work required to compile or duplicate the information from the basic data is charged to the subscriber.

The preparation of these reports on a cost basis is carried out in accordance with the Bureau of the Census "Policy Governing Special Services" set forth in current issues of the Bureau of the Census catalog. This reads in part as follows:

It is the policy of the Department of Commerce and the Bureau of the Census to assure that the general public does not bear any of the cost of special services to private groups and individuals, who will be charged at cost for such services. It is also part of the program of the Bureau of the Census to furnish specialized service to other government agencies at cost. There is a wide range in the costs for Census Bureau data made available to users, depending on the methods used and other factors.

Special services, including compiling special tabulations, are furnished at cost, that is, at the actual cost of the project to the Census Bureau. This cost is determined on the basis of such factors as the quantity of data requested, the amount of work required to obtain the data, the complexity of data specifications requested, processing costs for personnel and equipment, and the format (photocopies, computer tapes, etc.) in which the data are made available, as well as planning costs and appropriate charges for overhead expenses. The charge for special services does not include the cost of collecting the data unless special questions have been added to the questionnaire at the buyer's request or an entire survey is undertaken for the sponsoring organization.

Special tabulations or transcriptions of data in the files of the Bureau of the Census will be undertaken on a cost basis, insofar as Bureau facilities are available. Those requesting special tabulations should understand that the data are based on surveys paid for by public funds and are therefore public property. The purpose for which such tabulations are obtained must not be contrary to the public interest or be used to give unfair commercial or other advantage to any person or group.

All unpublished data furnished by the Bureau will be accompanied, so far as feasible, by appropriate statements on the limitations of the data. When the condition of the data warrants it, the Bureau may specify that the material is for the information of the purchaser only and may not be published or that any proposed publication of such material must be approved by the Bureau before publication.

Special tabulations paid for by nongovernmental groups will be prepared under the following conditions:

1. If the Bureau regards the material to be of general interest, it may be published subsequently by the Bureau and made generally available at cost of publication. If such action is taken within the time period provided in the agreement, or within 6 months if no time period is provided in the agreement, the Bureau will notify all purchasers of its decision to publish the tabulation.

2. If not published, it may be made available to other government agencies or to appropriate nonprofit research groups at cost of duplication.

3. A request by a user other than a governmental agency for a tabulation already prepared for another buyer will usually be handled in the following manner, if the information has not already been published by the Bureau:

- a. If a job has not been completed, the costs will be appropriately divided and results will be furnished to both parties.

- b. When, within the time period provided in the original agreement, information furnished to commercial groups or private individuals is requested by other commercial groups or individuals, the subsequent party or parties will be charged not less than the amount paid by the first party obtaining the information. Specified time periods will generally not exceed 18 months. If no time period is provided in the agreement, this provision will apply for 6 months from the date of delivery to the initial purchaser. If the cost to the Bureau for furnishing the information to the subsequent party is significantly less than that charged for the original information and the information is furnished within the agreed-upon time period referred to above, the total cost will be prorated among the various parties in an equitable manner as determined by the

Bureau and refunds will be made as necessary. Refunds, however, will not be made for amounts under \$25. After the specified period, subsequent requests for the same tabulation will be filled at only the additional cost, if any, to the Bureau and no refunds to prior purchasers will be considered.

c. If, for any reason, the Bureau feels that the purchaser of a special tabulation is making unfair or improper use of the information furnished, it may take such action as is deemed appropriate to protect the public interest.

Certain specific points in regard to the application of these policies to the various types of foreign trade reports are described below:

Type A. Advance reports containing final monthly figures not yet available in duplicated report form.

Advance reports present postings from machine tabulation sheets at the time the sheets are made publicly available. These sheets are made available several weeks prior to the date on which reports containing the information are distributed in duplicated form. Since the information in advance reports is already publicly available at the time the advance reports are released, the data have to all intents and purposes been published by the Bureau of the Census and the Census "Policy Governing Special Services" is therefore largely inapplicable. Anyone wishing the same type of report can obtain it only on paying the full price of the report, the price in all cases representing the actual clerical cost of posting information from the unduplicated machine tabulation sheets already made available for public reference.

Type B. Reports presenting recom compilations of information already published or already made available for public reference in the form of machine tabulation sheets.

These reports may be very simple and may, for example, merely represent recom compilations of information from machine sheets available for public reference. For example, a report of this type may present information on how much of a particular commodity was exported from the United States through a particular Customs district. This information is available for public reference in different form in copies of machine tabulation sheets showing exports in a commodity by country of destination by customs district arrangement. The report in this example would essentially consist of combining the figures of the movement to each country through the particular Customs district into a total of the amounts shipped to all countries through that Customs district.

Some Type B reports are considerably more complicated rearrangements of information already publicly available. For example, SM 705, presents data on waterborne exports classified by type of vessel

service, by U.S. Customs district and port of lading, by foreign port of unloading, by commodity, and by country of destination. The subscriber to a report to be prepared on a cost basis may wish all of this information rearranged into commodity by U.S. port arrangement with no segregation by foreign port of unloading. Some such reports can be prepared by manually rearranging the information in the SM 705 in the form requested. In other cases it is substantially more efficient to retabulate the Bureau of the Census source material which was used to prepare the SM 705 into the form requested. The person requesting and paying for such a report pays for the cost of compiling the information either manually or by electronic equipment, whichever is more efficient.

The subscriber to Type B reports is entitled to some assurance that other private organizations and individuals will not under ordinary circumstances obtain access to the information at the same time at no cost or at a substantially reduced cost. Therefore, Type B reports will ordinarily not be made available to the public without charge or at a substantially reduced cost until 6 months after the reports have been transmitted to the person or organization paying for them. However, the Bureau of the Census reserves the right to publish the data at an earlier date under circumstances such as those described in the extract from the Bureau's "Policy Governing Special Services" quoted previously.

When the Bureau receives requests from private organizations of individuals for the information in Type B reports before the expiration of the 6-month or other interval described above, the inquirer will pay the same amount as the person who originally subscribed to the report.

If the cost to the Bureau for furnishing the information to the subsequent party (parties) is significantly less than that charged for the original information, the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau. Refunds, however, will not be made for amounts under \$25.

Although information in such reports is being made available on request to Government agencies for their own use during the period the report is not to be released, such agencies are not permitted to release the information publicly without permission having been first obtained from the Bureau. Such permission is granted only under circumstances falling within the Bureau policy quoted previously.

Type C. Reports which present information not publicly available in any form.

Included are reports showing separate statistics on exports or imports of individual products included, without segregation, in a Schedule B or a TSUSA

commodity classification regularly shown in the published statistics, and other information not available in published reports or in machine tabulations available for public reference. Information in Type C reports can, therefore, only be obtained from information on punchcards, electronic computer tape, Shipper's Export Declarations, or import entry forms not publicly available.

The policy followed in making Type C reports publicly available is similar to the policy followed by Type B, described above. Since, in contrast to Type B, Type C reports represent newly compiled information not otherwise publicly available, there is a greater likelihood that the Bureau may find it necessary to release the information in Type C reports at a date earlier than 6 months after transmittal to the subscriber.

Preliminary Investigations

In addition to the actual work involved in preparing Type B and Type C reports, there are, in some cases, considerable amounts of work required in preliminary investigations of basic records even before estimates of the cost of preparing the reports can be made. These preliminary investigations of basic records, depending on the information to be obtained for the report, include such determinations as the following:

1. Whether the desired information is available.
2. Whether the release of desired information would tend to reveal the transactions of individual firms, in which case the information would not be released.
3. The best procedure under which the information would be obtained. This determination would include the comparison of costs under alternate procedures and the selection of the procedure with the lowest cost.

Preliminary investigations along the lines outlined above are not required for all reports. However, if a preliminary investigation is required before the cost of some reports can be estimated, persons requesting such reports will be charged the cost of the investigation. Wherever it is necessary to make a charge for preliminary investigation, the charge will usually be \$250.

Request for additional information in regard to the preparation and release of foreign trade special reports prepared on a cost basis should be addressed to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

SPECIAL SERVICES

The Bureau of the Census provides a service whereby users of foreign trade statistics may obtain data prepared to meet

their special needs on a cost-to-subscriber basis. This service provides a variety of information available in different arrangements and furnished in various forms. Copies of foreign trade machine tabulations may be obtained in the form of microfiche, magnetic tapes, and photocopies of microfiche output. Portions of tabulations may also be obtained containing data in various arrangements, such as: data for specific commodities or commodity groupings, commodity by country or area, commodity by country by district, area or country by commodity, etc. In addition, it is frequently possible to obtain special reports containing data in greater detail than that included in regular reports and tabulations.

These services are available directly from the Bureau of the Census, Washington, D.C. 20233. Copies of order blanks for use in subscribing to most of these special services are included at the back of this Guide. Additional information regarding special services may be obtained from the Bureau of the Census.

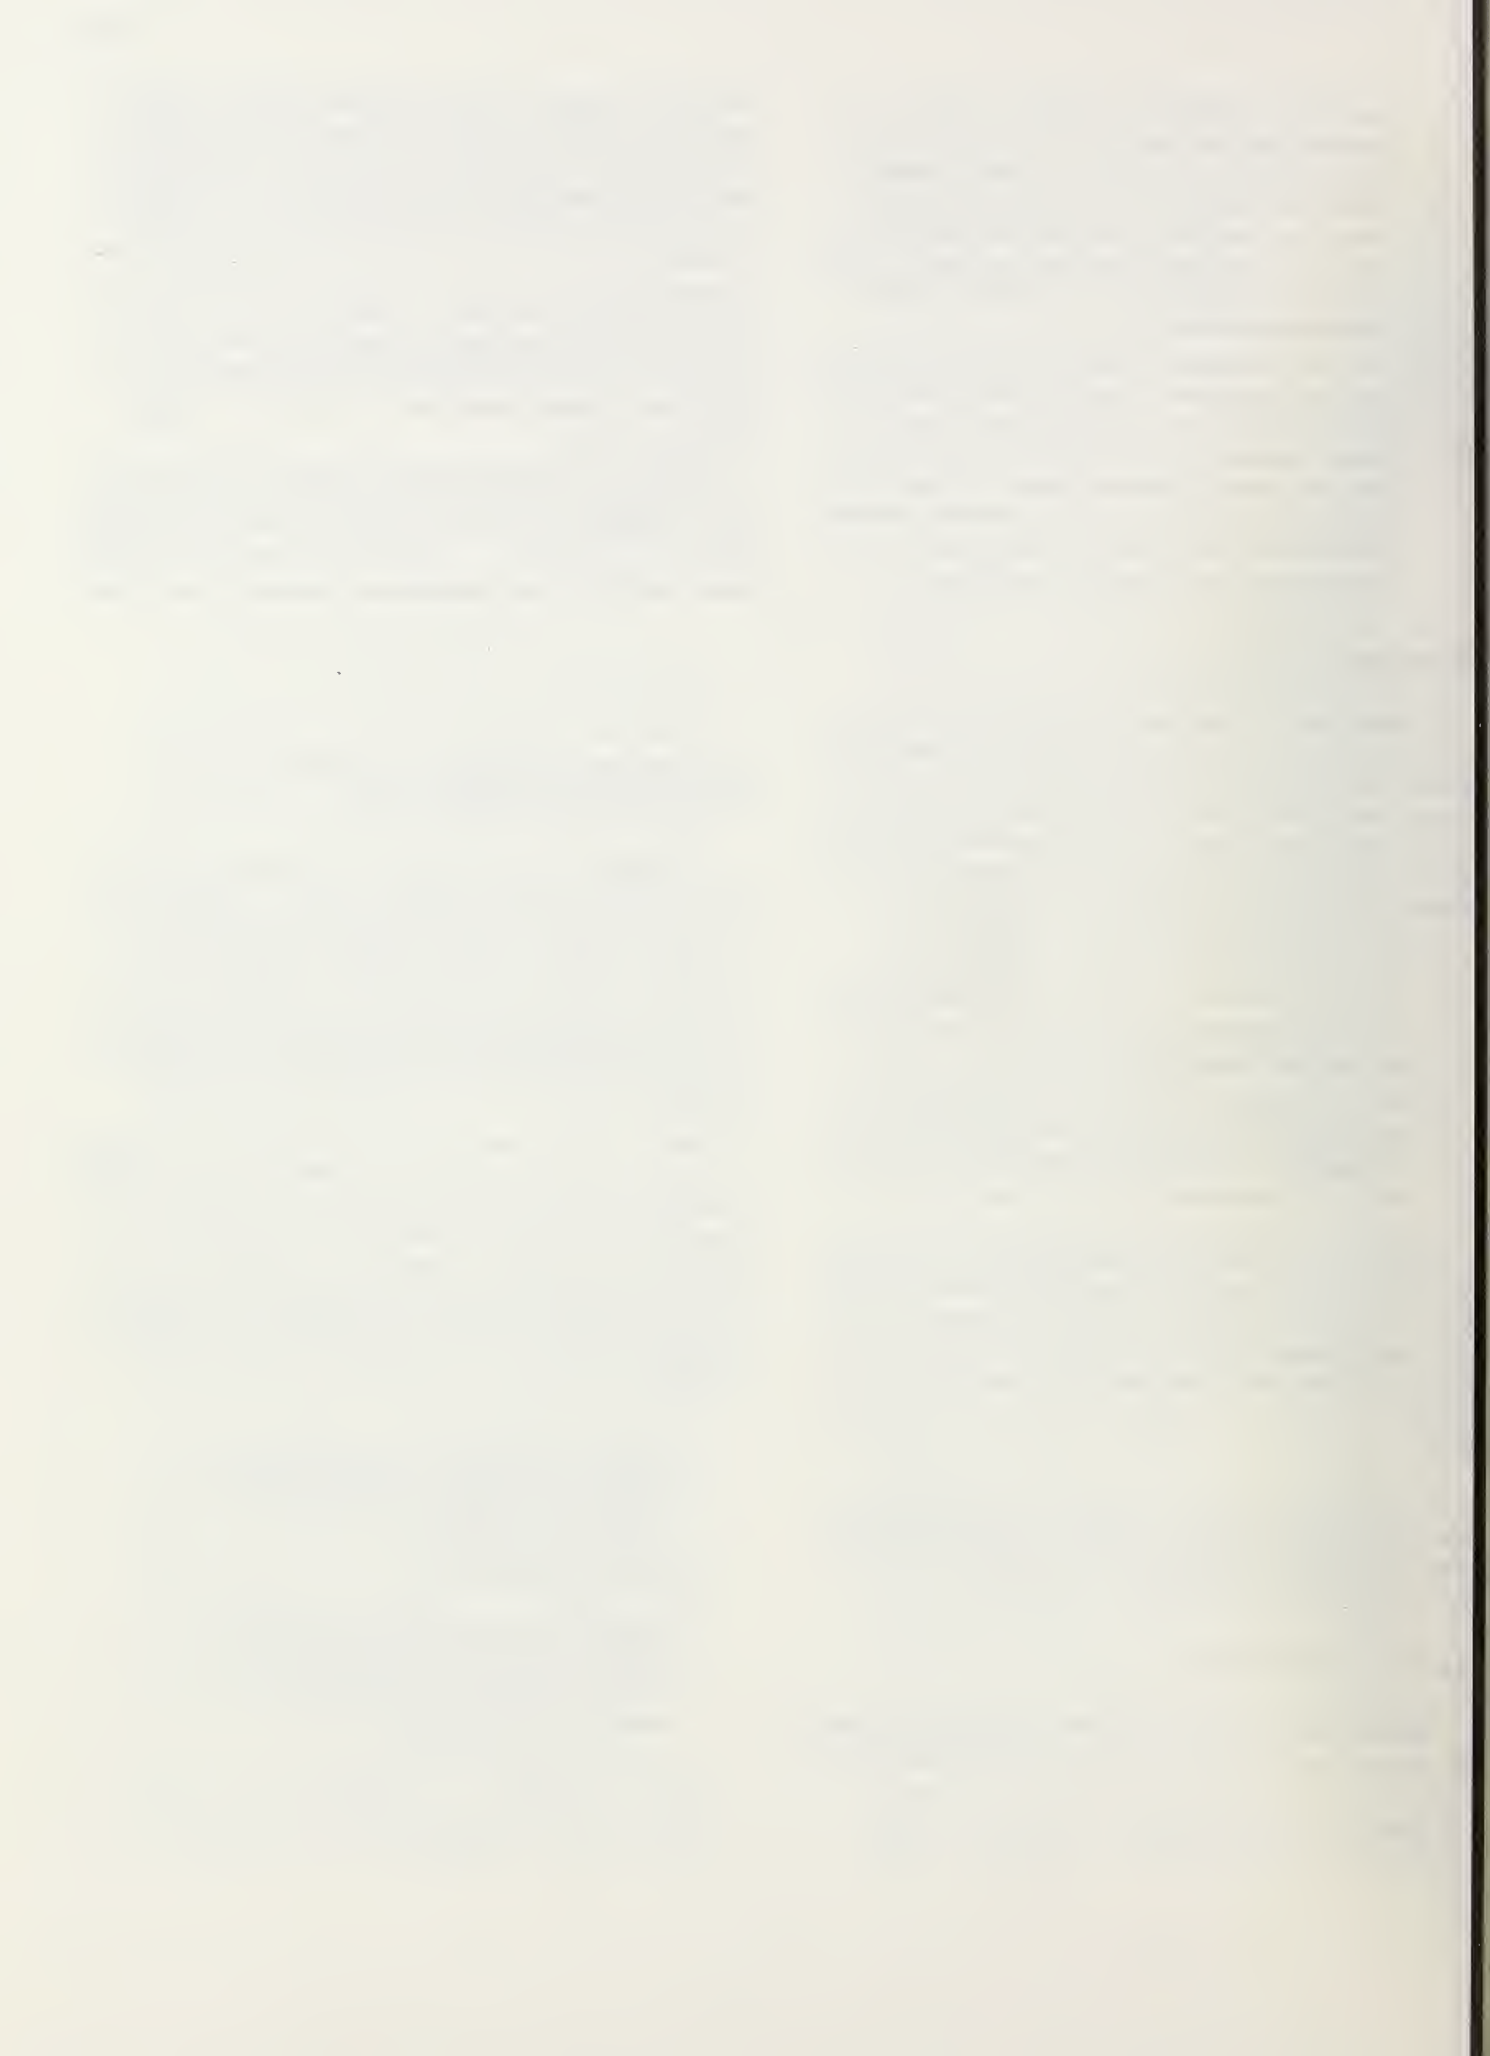

SOURCES OF FURTHER INFORMATION ABOUT FOREIGN TRADE STATISTICS

A discussion of the compilation procedures and coverage of the statistics appears in reports FT 135, FT 410, and other statistical publications. Supplementary information and explanations of interest to users of foreign trade statistics (such as notices of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) are included as special announcements in current issues of the statistical publications.

Copies of foreign trade reports and tabulations are available for public reference use at Department of Commerce field offices and at some U.S. Customs Service offices. A list of the Commerce field offices is provided on page 138 of this publication. Information regarding the availability of foreign trade material may be obtained from the individual offices or from the Bureau of the Census, Washington, D.C. 20233. Foreign trade material is also available at the following reference locations:

**Foreign Trade
Statistics Press
Releases and
Publications**

THE UNIVERSITY OF CHICAGO
LIBRARY
1100 EAST 58TH STREET
CHICAGO, ILL. 60637

The published reports containing foreign trade data fall into two general categories, (a) monthly publications and (b) annual publications.

Reports containing summary statistics are released monthly unless otherwise indicated. In some instances monthly reports include both current monthly and cumulative data for the current year, with annual totals appearing in the December issue. For those monthly reports which do not include cumulative data, a separate annual issue is published. A list of the monthly publications by number and title is given below. Illustrations of the data included in the reports are presented on the pages indicated. These exhibits indicate the general format and type of information to be found in the reports. Monthly publication reports may be obtained from the Bureau of the Census by subscription. (See order blank at the back of this publication.)

Published reports containing more detailed statistics than those presented in the monthly publications are listed below by report number and title of report. These reports contain current monthly and cumulative data with annual totals appearing in the December issue, except as noted. Illustrations of tables contained in the reports are shown on the pages indicated for each report. (See order blank at the back of this publication.)

COMBINED IMPORTS AND EXPORTS

(Imports include general imports and imports for consumption unless otherwise indicated. Exports include exports of domestic and foreign merchandise, shown separately, unless otherwise indicated.)

FT 900	U.S. Export and Import Merchandise. Seasonally Adjusted and Unadjusted Data. Customs and c.i.f. Values) Published monthly. (See pages 29-33.)
FT 975	Vessel Entrances and Clearances. Number and Tonnage, Flag, District and Port. Published annually only. (See page 34.)
FT 985	U.S. Waterborne Exports and General Imports. Trade Area, District, Port, Type Service and U.S. Flag. (Customs Value) Published monthly and annually. (See pages 35-41.)
FT 986	U.S. Airborne Exports and General Imports. Shipping Weight and Value, Customs District Port, and Continent. (Customs Value) Published monthly and annually. (See page 42.)
FT 990	Highlights of U.S. Export and Import Trade Seasonally Adjusted and Unadjusted Data, Commodity, Country, Customs District, Method of Transportation, (Exports f.a.s.; Imports Customs and c.i.f. Values) Published monthly. (See pages 43-67.)

IMPORTS

FT 130	U.S. General Imports of Cotton, Wool, and Man-Made Fiber Manufactures. Country of Origin and Cotton, Wool, and Manmade Fiber Agreement Categories. Current month and cumulative year-to-date. Published monthly. (See page 68.)
FT 135	U.S. General Imports and Imports for Consumption. Schedule A Commodity by Country (Customs and c.i.f. Values.) Published monthly. (See page 69.)
FT 150	U.S. General Imports. Schedule A Commodity Groupings, World Area, Country, and Method of Transportation. (Customs Value) Published annually only. (See pages 70-71.)
FT 155	U.S. General Imports. World Area, Country, Schedule A Commodity Groupings, and Method of Transportation. (Customs Value) Published annually only. (See pages 72-73.)
FT 210	U.S. Imports for Consumption and General Imports. SIC-Based Products and Area (Customs Value) Published annually only. (See pages 74-75.)
FT 246	U.S. Imports for Consumption and General Imports. TSUSA Commodity and Country. (Customs and c.i.f. Values) Published annually only. (See page 76.)

EXPORTS

FT 410	U.S. Exports. Schedule E Commodity by Country, (F.a.s. Value) Published monthly. (See page 77.)
FT 446	U.S. Exports. Schedule B Commodity by Country. (Domestic and foreign merchandise shown separately.) (F.a.s. Value) Published annually only. (See page 78.)
FT 450	U.S. Exports. Schedule E Commodity Groupings, World Area, Country, and Method of Transportation. (F.a.s. Value) Tables 1-5. Published annually only. (See pages 79-80.)
FT 455	U.S. Exports. World Area, Country, Schedule E Commodity Groupings, and Method of Transportation. (F.a.s. Value) Tables 1-5. Published annually only. (See pages 81-82.)
FT 610	U.S. Exports of Domestic Merchandise, SIC-Based Products and Area. (F.a.s. Value) Published annually only. (See page 83.)

FT 800 U.S. Trade with Puerto Rico and U.S. Possessions.
(Exports f.a.s.; Imports Customs Values) Published monthly and annually. (See pages 84-85.)

BUNKER FUELS

FT 810 Bunker Fuels. Oil and Coal Laden in the United States on Vessels Engaged in Foreign Trade. (Customs Value) Published monthly. (See page 86.)

(Issued monthly. Annual data in December reports)

Table 1. U.S. Exports, General Imports, and Merchandise Trade Balances, by Month: January 1981 to December 1982

(Values in millions of dollars, seasonally adjusted. Exports are on a f.a.s. value basis only; general imports are shown in terms of c.i.f. and Customs values. See "Explanation of Statistics" for information on coverage, definitions of export and import values, and sources of further information)

Period	Exports ^{1 2}		General Imports ^{1 2}				Trade Balances	
	F.a.s. value seasonally adjusted (mil. dollars)	Percent change from previous month	C.i.f. value		Customs value		F.a.s. exports; c.i.f. imports (mil. dollars)	F.a.s. exports; Customs imports (mil. dollars)
			Seasonally adjusted (mil. dollars)	Percent change from previous month	Seasonally adjusted (mil. dollars)	Percent change from previous month		
1981

TABLE 2. U.S. EXPORTS AND GENERAL IMPORTS OF MERCHANDISE BY SELECTED COMMODITY GROUPINGS, WORLD AREAS AND COUNTRIES

In millions of dollars. Exports are f.a.s. (free alongside ship) U.S. port of exportation value basis. General imports are c.i.f. (cost, insurance, freight) and Customs value bases. Export and import data are adjusted for seasonal and/or working-day variation unless otherwise noted by the symbol (u) following the item description. Export and import figures include data on U.S. Virgin Islands trade with foreign countries.

Item	December 1982	November 1982	October 1982	Difference Value	
				December vs. November	November vs. October

Part A. Overall Totals:

Domestic and Foreign Exports, excluding 000 shipments	16,335.3	15,692.7	16,697.7	+642.6	-1,005.0
General Imports, c.i.f.	19,700.8	19,782.8	22,024.1	-82.0	-2,241.3
Trade balance	-3,365.5	-4,090.1	-5,326.4	+724.6	+1,236.3
General Imports, Customs	18,864.7	18,936.5	21,096.0	-71.8	-2,159.5
Trade balance	-2,529.4	-3,243.8	-4,398.3	+714.4	+1,154.5

Part B. Selected Export and Import Commodity Groupings:

Agricultural commodities					
Domestic and Foreign Exports	2,657.7	2,794.0	2,804.7	-136.3	-10.7
General Imports, c.i.f.	1,371.5	1,315.4	1,593.0	+56.1	-277.6
Trade balance	+1,286.2	+1,478.6	+1,211.7	-192.4	+266.9
General Imports, Customs	1,250.8	1,198.4	1,445.6	+52.4	-247.2
Trade balance	+1,406.9	+1,595.6	+1,359.1	-188.7	+236.5
Petroleum and selected products (u)					
Domestic Exports	491.2	362.1	554.0	+129.1	-191.9

(Issued monthly. Annual data in December reports)

TABLE 2. U.S. EXPORTS AND GENERAL IMPORTS OF MERCHANDISE BY SELECTED COMMODITY GROUPINGS, WORLD AREA AND COUNTRIES--continued

REPORT 975

(Issued Annually)

Number and Net Registered Tonnage of U.S. and Foreign Flag Vessels Entered and Cleared With Cargo and in Ballast in the Foreign Trade of the United States, by Customs District and Port of Entry: Calendar Year 1981

(See coverage statement for information on sources of error in the data. Tons shown are net tons of 100 cubic feet carrying capacity of vessels and do not represent the actual weight of cargo carried. The Customs district totals include number and tons of vessels for all ports of entry though only selected ports within a district are shown)

¹Symbols used in the SIC-based import numbers represent combinations of two or more whole 5-digit SIC product classes, as follows:

- A - all within the same 4-digit class,
- B - all within the same 3-digit but some different 4-digit classes,
- C - all within the same 2-digit but some different 3-digit classes,
- D - all within the same division but some different 2-digit classes,
- E - within different divisions,
- X - all 5-digit classes within the same 4-digit (or 3-digit) are included.

²Import data in this detail are not available.

³"X" does not indicate a combination and is used only as an instrument to obtain the desired numbering sequence.

⁴Part of this SIC-based output product code is assigned to other SIC-based import product codes.

U.S. IMPORTS FOR CONSUMPTION

(Issued Annually)

Table 1. TSUSA Commodity by Country of Origin

(See Explanation of Statistics for information on coverage, compiling procedures, sources of error in the data, the symbols OTH CTY, UNIDENT and definitions of Customs, and c.i.f. values and import charges. Numeric codes preceding country descriptions represent the following: 1—country of shipment, country of origin unknown; 2—items imported under Tariff Provision 807.00; 3—items imported under Tariff Provision 806.30; and 4—items imported under the Generalized System of Preference Provisions of the Trade Act of 1974; 5—Certified Hand-Loomed and Folklore Products; 6—Foreign Trade Zone Privileged status; and 8—Foreign Trade Zone Non-Privileged status).

U.S. EXPORTS OF DOMESTIC MERCHANDISE

(Issued Annually)

Table 1. SIC-Based Product Code by World Area (F.a.s. Value)

(See "Explanation of Statistics" for information on coverage, security restrictions, sources of error in the data, and related matters. SIC-based product codes which include Special Category shipments, if any, are identified with an asterisk (*). For the asterisked commodities, Special Category shipments are not included in the SIC-based product code by area totals, but are combined and designated "ALL AREAS SPECIAL CATEGORY" and shown at the end of the list of areas for the asterisked commodity).

¹Symbols used in the SIC-based import numbers represent combinations of two or more whole 5-digit SIC product classes, as follows:

- A - all within the same 4-digit class,
- B - all within the same 3-digit but some different 4-digit classes,
- C - all within the same 2-digit but some different 3-digit classes,
- D - all within the same division but some different 2-digit classes,
- E - within different divisions,
- X - all 5-digit classes within the same 4-digit (or 3-digit) are included.

²Import data in this detail are not available.

³"X" does not indicate a combination and is used only as an instrument to obtain the desired numbering sequence.

⁴Part of this SIC-based output product code is assigned to other SIC-based import product codes.

As a part of its regular statistical program, the Census Bureau prepares tabulations and reports for public reference use which contain data in various arrangements and in greater detail than the statistics presented in published reports. The tabulations and reports, in general, contain both net quantity and value information. Some tabulations contain method of transportation information, i.e., separate data for shipments by vessel and air. In such cases, value data (also frequently net quantity data) are presented for all methods of transportation combined, with separate shipping weight and value information shown for vessel and air shipments. In the import tabulations, method of transportation information is presented for general imports only. Imports for consumption data represent shipments by all methods of transportation combined. Also in the import tabulations, Customs district information represents district of entry for both imports for consumption and general imports by all methods of transportation, but represents district of unloading for general imports by vessel and air when such data are shown separately.

Lists of the tabulations, showing identification number and a brief description of the general arrangement of the data in each tabulation, appear below. The general format of the tabulations is illustrated in exhibits on the indicated pages. If a tabulation contains both current monthly and cumulative data, annual information is presented in the December issue. (See list of annual tabulations for additional sources of annual data.) In those cases where both a monthly and an annual tabulation are prepared in the same arrangement, a single exhibit is presented, representing both the monthly and the annual tabulation.

IMPORTS

(Include general imports and imports for consumption, unless otherwise indicated.)

IM136	U.S. Imports for Consumption and General Imports. Continent by country of origin by TSUSA Schedule by TSUSA commodity by unit control by Customs district and method of transportation. (Customs Value) Current month. Annual data in IA 236. (See page 92.)	IM 145-A	U.S. Imports for Consumption and General Imports TSUSA Schedule by TSUSA commodity by unit control by country of origin. Data in terms of TSUSA Schedules 1 through 7 commodity numbers for metal articles manufactured in the United States, exported for further processing abroad, and returned to the United States for further processing (TSUSA No. 806.3000) and articles assembled abroad from components produced in the United States (TSUSA No. 807.0000), all methods of transportation combined. (Customs Value) Current month. Annual data in IA 245-A. (See page 94.)
IM136-A	U.S. Imports for Consumption and General Imports. Country of origin by TSUSA commodity by unit control. Data in terms of TSUSA Schedules 1 through 7 commodity numbers for metal articles manufactured in the United States, exported for further processing abroad, and returned to the United States for further processing (TSUSA No. 806.3000) and articles assembled abroad from components produced in the United States (TSUSA No. 807.0000). All methods of transportation combined. (Customs Value) Annual data in IA 236-A. (See page 93.)	IM 145-X	U.S. Imports for Consumption and General Imports. TSUSA Schedule, by TSUSA number, by unit control by country of origin, by Customs district, by rate provision by type, by economic class and for all methods of transportation combined. (Customs and c.i.f. Import Values) Annual Data in IA 245-X. (See page 95.)
		IM 145-Y	U.S. General Imports. TSUSA Schedule by TSUSA Number, by unit control, by country of origin, by Customs district, by rate provision, by type, by economic class and method of transportation. (Customs Import Value and Charges) Annual data in IA 245-Y. (See page 96.)
		IM 145-Z	U.S. Imports for Consumption and General Imports. TSUSA Schedule by TSUSA number by unit control by country of origin by Customs district, by rate provision by type by economic combined, (C.i.f. Value) Annual data in IA 245-Z. (See page 97.)
		IM 146	U.S. Imports for Consumption. TSUSA Schedule, by TSUSA commodity, by unit control, by country or origin, all methods of transportation combined. Also shows dutiable value, calculated duty, and average ad valorem rate of duty. (Customs Value) Current month and cumulative year-to-date. (See page 98.)
		IM 150	U.S. General Imports. Schedule A commodity groupings, world area, country or origin and method of transportation. (Customs Value) Current month and cumulative year-to-date. Tables 1, 2, and 3. (See pages 99-100.)
		IM 154	U.S. Imports for Consumption and General Imports. Customs district by country of origin by TSUSA commodity by unit control and method of transportation. (Customs Value) Current month. Annual data in IA 254. (See page 103.)

IM 155	U.S. General Imports. World Area, Country, Schedule A Commodity groupings, and method of transportation. (Customs Value) Current month and cumulative year-to-date. Tables 1, 2, and 3. (See pages 101-102.)			subgroup totals. Table 4. (F.a.s. Value) Current month and cumulative year-to-date. (See pages 111-112.)
IM 160	General Imports into the United States from Guam, and American Samoa. Country by Customs district of entry by type, all methods of transportation combined. (Customs Value) Current month. (See page 104.)	EM 455		U.S. Exports of Domestic Merchandise. World Area, Country, Schedule E commodity groupings, and method of transportation. Tables 1, 2, and 3. U.S. Exports of Foreign Merchandise. World area subgroup totals. Table 4. (F.a.s. Value) Current month and cumulative year-to-date. (See pages 113-114.)
IM 161	General Imports into the United States from the Virgin Islands—Country of origin by TSUSA commodity by unit control by Customs district of entry by type, all methods of transportation combined. (Customs Value) Current month. (See page 105.)	EM 522		U.S. Exports. Schedule B commodity by country of destination, by Customs district of exportation and method of transportation. (F.a.s. Value.) Current month. Annual data in EA 622. (See page 115.)
IM 171	U.S. General Imports. "End-use" commodity categories by area or country arrangement and vice-versa, all methods of transportation combined. General imports only. (Customs Value) Current month, cumulative year-to-date, and individual quarters of the year. Eleven parts. (See pages 106-108.)	EM 531		U.S. Exports. Continent by country of destination by Schedule B commodity by Customs district of exportation and method of transportation. (F.a.s. Value.) Current month. Annual data in EA 631. (See page 116.)
IA 253	U.S. General Imports and Imports for Consumption. Customs district by TSUSA commodity by unit control by country of origin, all methods of transportation combined. Also shows dutiable value and calculated duty for imports for consumption. (Customs Value) (See page 109.)	EM 546		U.S. Exports. Schedule B commodity, by unit control, by country of destination. (F.a.s. Value.) Current month. (See page 117.)
IA 275	U.S. Imports for Consumption and General Imports. SIC-division by SIC-based 2-digit, 3-digit, and 4-digit product code by country of origin, all method of transportation combined. (Customs and C.i.f. Values) (See page 110.)	EM 563		U.S. Exports. Customs district of exportation by country of destination, by Schedule B commodity and method of transportation. (F.a.s. Value.) Current month. Annual data in EA 663. (See page 118.)
IA 276	U.S. Imports for Consumption and General Imports. SIC-based 8-digit product code by country of origin, all methods of transportation combined. (Customs Value) (See page 110.)	EM 571		U.S. Exports. "End-use" commodity categories by area or country arrangement and vice-versa, all methods of transportation combined. (F.a.s. Value.) Current month, cumulative year-to-date, and individual quarters of the year. Eleven parts. (See pages 119-121.)
		EM 594		Shipments of Merchandise from the United States to Puerto Rico, U.S. Virgin Islands, and Shipments from Puerto Rico to the United States—Schedule B Commodity by country of destination by Customs district of exportation and method of transportation. (F.a.s. Value) Current month. Annual data in EA 694. (See page 122).

EXPORTS

(Include exports of domestic and foreign merchandise, shown separately, unless otherwise indicated.)

EM 450	U.S. Exports of Domestic Merchandise. Schedule E commodity groupings, world area, country and method of transportation. Tables 1, 2, and 3. U.S. Exports of Foreign Merchandise. Schedule E	EM 596		Shipments of Merchandise from the United States to Puerto Rico, U.S. Virgin Islands, and Shipments from Puerto Rico to the United States—Customs district of exportation by country of destination by Schedule B commodity and method of transportation. (F.a.s.
--------	---	--------	--	--

Value.) Current month. Annual data in EA 696.
(See page 123.)

EA 664 U.S. Exports, Customs district of exportation by Schedule B commodity by country of destination and method of transportation. (F.a.s. Value)
(See page 124.)

EA 675 U.S. Exports, SIC-division by SIC-based 2-digit, 3-digit, and 4-digit product code by country of destination, all method of transportation combined. (F.a.s. Value) (See page 125.)

EA 676 U.S. Exports, SIC-based 8-digit product code by country of destination, all methods of transportation combined. (F.a.s. Value) (See page 126.)

WATERBORNE TRADE (SHIPPING)

(Imports)

SM 305 U.S. Waterborne General Imports—Type of vessel service by Customs district and port of unlading by foreign port of lading by Schedule A subgroup by country of origin. (Customs Value) Current month. Annual data in SA 305. (See page 127.)

SM 305-IT U.S. Waterborne Inbound In-Transit Merchandise Same arrangement as SM 305, above. (Customs Value) Annual data in SA 305-IT. (See page 127.)

SM 311 U.S. Waterborne General Imports—Type of vessel service by trade area of lading by coastal district of unlading by country of lading by Customs district of unlading. Current month. (Customs Value) Annual data in SA 311. (See page 128.)

SM 311-IT U.S. Waterborne Inbound In-Transit Shipments. Same arrangement as SM 311, above. (Customs Value) Annual data in SA 311-IT. (See page 128.)

AE 350 Listing of vessel entrances, released in two parts.
(See pages 129.)

(1) By name of vessel, in alphabetic order.
Current month.

(2) By name of vessel, in Customs district, port, and manifest number arrangement.
Current month.

(Exports)

SM 705 U.S. Waterborne Exports of Domestic and Foreign Merchandise—Type of vessel service by Customs district and port of lading by foreign port or country/area of unlading by Schedule B subgroup by country of destination. (F.a.s. Value.) Current month. Annual data in SA 705. (See page 130.)

SM 705-IT U.S. Waterborne Outbound In-Transit Merchandise. Same arrangement as SM 705, above, plus country of origin. (F.a.s. Value.) Annual data in SA 705-IT. (See page 130.)

SM 705 Supplement U.S. Waterborne Department of Defense Controlled Cargo Under U.S. Foreign Aid Programs and Special Category non-Department of Defense Controlled Cargo—Type of vessel service by Customs district and port of lading by country/area of unlading. (F.a.s. Value.) Current month. Annual data in SA 705 Supplement. (See page 130.)

SM 711 U.S. Waterborne Exports of Domestic and Foreign Merchandise—Type of vessel service by trade area of unlading by coastal district of lading by country of unlading by Customs district of lading. (F.a.s. Value.) Current month. Annual data in SA 711. (See page 131.)

SM 711-IT U.S. Waterborne Exports.—Outbound In-Transit Merchandise. Same arrangement as SM 711, above. (F.a.s. Value.) Annual data in SA 711-IT. (See page 131.)

SM 711 Supplement U.S. Waterborne Exports.—Department of Defense Controlled Cargo under U.S. Foreign Aid Programs and Special Category Non-Department of Defense Controlled Cargo—Type service by coastal district of lading by basketized country (code 899) by Customs district of lading. (F.a.s. Value.) (See page 131.)

AE 750 Listing of vessel clearances, released in two parts.
(See page 132.)

(1) By name of vessel, in alphabetic order.
Current month.

(2) By name of vessel, in Customs district, port, and manifest number arrangement.
Current month.

3. TSUSA subpart								7. Economic class totals							
4. TSUSA part															
Code 2 indicates items imported under Tariff Provision 807.00. Code 3 indicates items imported under Tariff Provision 806.30. For technical reasons the "dutiable value" shown for these items is overstated. It includes not only the dutiable value but also the value of U.S. products eligible for duty free consideration under Tariff Provisions 807.00 and 806.30. Separate data on the U.S. value (duty free) and the foreign value (dutiable) for these items is available in unpublished form on a delayed basis. Requests should be made to the Bureau of the Census.															
For item 700.60 the values (and dutiable values) reported for statistical purposes represent the purchase price, although some items may actually be dutiable at values based upon the American selling price of like or similar articles manufactured or produced in the United States.

U.S. GENERAL IMPORTS AND IMPORTS FOR CONSUMPTION

Customs District of Entry by TSUSA Number by Unit Control by Country of Origin

(Excludes quantity only items)

Year and customs district of entry code and description									
TSUSA number, commodity description, and unit of quantity									
Country code	Origin	Shipment-1;(1)	General imports			Imports for consumption			
			Net quantity (Unit control-0)	Value (dollars)	Net quantity (Unit control-2)	Net quantity (Unit control-0)	Value (dollars)	Net quantity (Unit control-2)	Dutiable value (dollars) ²
			Totals 1,2	Totals 1-4	Totals 1,2	Totals 1,2	Totals 1-4	Totals 1,2	Totals 1-4

TOTALS:

1. Customs district of entry by TSUSA number by unit control by country of origin
2. Customs district of entry by TSUSA number by unit control

3. Customs district of entry
4. Global (grand total)

¹Code 2 indicates items imported under Tariff Provision 807.00. Code 3 indicates items imported under Tariff Provision 806.30. For technical reasons the "dutiable value" shown for these items is overstated. It includes not only the dutiable value but also the value of U.S. products eligible for duty free consideration under Tariff Provisions 807.00 and 806.30. Separate data on the U.S. value (duty free) and the foreign value (dutiable) for these items are available in unpublished form on a delayed basis. Requests should be made to the Bureau of the Census.

²For item 700.60 the values (and dutiable values) reported for statistical purposes represent the purchase price, although some items may actually be dutiable at values based upon the American selling price of like or similar articles manufactures or produced in the United States.

MONTHLY VESSEL ENTRANCES IN ALPHABETIC VESSEL NAME ARRANGEMENT

EXPLANATION OF CODES:

- | | | |
|--|---|---|
| Type Service
1. Liner or berth
4. Tanker
5. Irregular or tramp

Rig
1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, row-boat, research vessel | Ballast or Cargo
1. Vessel entered direct from foreign ports in ballast
2. Vessel entered direct from foreign ports with bulk cargo
3. Vessel entered direct from foreign ports with general cargo
4. Vessel entered via other domestic ports in ballast
5. Vessel entered via other domestic ports with bulk cargo
6. Vessel entered via other domestic ports with general cargo

Country and Subdivision or U.S. Port
Indicates first foreign country entering direct from (origin of inbound voyage) in terms of Schedule C code. Where "country from" has marked coastal differences a further distinguishing sub-country code is added—otherwise sub-country code is always "0". If entering via domestic ports, indicates last U.S. port vessel cleared in terms of Schedule D code. | Type Vessel
0. Vessels from other domestic ports, Navy operated vessels, vessels in for repairs or crew change and all other types excluded by reason of FT 975 coverage.
1. All vessels except tanker entered direct from ports
2. Tankers entered direct from foreign ports

Type Cargo
0. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

Trip
0. No foreign cargo discharged at this port
1. Foreign cargo discharged at this port
9. Vessels under 26 net registered tons |

AE 750 - Part 1

(Issued Monthly)

Monthly Vessel Clearances in Alphabetic
Vessel Name Arrangement

EXPLANATION OF CODES:

Type Service

1. Liner or berth
4. Tanker
5. Irregular or tramp

Rig

1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, rowboat, research vessel

Ballast or Cargo

1. Vessel cleared direct to foreign ports in ballast
2. Vessel cleared direct to foreign ports with bulk cargo
3. Vessel cleared direct to foreign ports with general cargo
4. Vessel cleared via other domestic ports in ballast
5. Vessel cleared via other domestic ports with bulk cargo
6. Vessel cleared via other domestic ports with general cargo

Country and Subdivision or U.S. Port

Indicates first foreign country clearing direct to (destination of outbound voyage) in terms of Schedule C code. Where "country to" has marked coastal differences a further distinguishing sub-country code is added—otherwise sub-country code is always "0". If clearing via domestic ports, indicates first U.S. port vessel entered in terms of Schedule D code.

Type Vessel

0. Vessels to other domestic ports, Navy operated vessels, vessels in for repairs or crew changes, and all other types excluded by reason of FT 975 coverage
1. All vessels except tanker cleared direct to foreign ports
2. Tankers cleared direct to foreign ports

Type Cargo

1. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

Trip

0. No U.S. or in-transit export cargo laden at this port
1. U.S. or in-transit export cargo laden at this port
9. Vessels under 26 net registered tons

Aids to Foreign Trade Statistics Users

List of Classification Schedules

To facilitate the compilation of the foreign trade statistics, various classification schedules are used for translating data such as commodity, country, district, etc. into numeric codes. The schedules contain lists of names or descriptions of the items with their assigned numeric codes. Following is a list of the classification schedules used in compiling and publishing the foreign trade statistics:

Schedule A—SITC-Based Classification of Commodities Imported into the United States¹

Schedule B—Statistical Classification of Domestic and Foreign Commodities Exported From the United States

Schedule C-E—Classification of Country and Territory Designations for U.S. Export Statistics

Schedule C-I—Classification of Country and Territory Designations for U.S. Import Statistics

Schedule D—Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics

Schedule E—SITC-Based Classification of Domestic and Foreign Commodities Exported From the United States¹

Schedule K—Classification of Foreign Ports by Geographic Trade Area and Country

Schedule R—Classification and Definitions of Foreign Trade Areas

Tariff Schedules of the United States Annotated

Product Codes—SIC-Based Export and Import Product Classifications

Schedule B (Export) commodity classifications rearranged into commodity classes based on the Standard Industrial Classification (SIC) for the purpose of relating exports to output.

TSUSA (Import) commodity classifications rearranged into commodity classes based on the Standard Industrial Classification (SIC) for the purpose of relating imports to output.

Copies of Schedule B and TSUSA may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. For information regarding other schedules, contact the Bureau of the Census.

¹ Based on the Standard International Trade Classification, Revision 2. United Nations Statistical Papers, Series M, No. 34/Rev. 2.

Microfiche & Magnetic Tapes

REPORTS ORDER FORM

POF 467 (10/82)
Supersedes POF 422

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

1983 UNPUBLISHED FOREIGN TRADE DATA

The Bureau of the Census makes a variety of detailed statistical data available in the form of microfiche and magnetic tape on a subscription basis. These data represent complete copies of the most detailed reports prepared for public reference.

The microfiche reports are 105 millimeter X 148 millimeter, negative copy, at 42X reduction. Each microfiche contains 208 frames of data arranged in 13 rows and 16 columns. The last frame on the microfiche is an index frame corresponding to the data on the microfiche. It is anticipated that in the future the Bureau of the Census will have additional capabilities to produce microfiche at 48X reduction. It is recommended that any acquisition of microfiche viewing or printing equipment for use in conjunction with these microfiche reports should have the ability to change from one magnification to another. Generally, this is a feature associated with interchangeable lenses and will provide the capability of using microfiche with greater reduction ratios as it becomes available.

Foreign trade data tapes are created on an IBM Model 4331 or Burroughs B6810 computers. Data are copied onto new magnetic tape. The subscription price quoted in this order form includes the cost of the new tapes. All tapes have 7200 character blocks and are available in the following densities:

- 9 track 800 BPI (EBCDIC or ASCII)
- 9 track 1600 BPI (EBCDIC or ASCII)
- 9 track 6250 BPI (ASCII)

In order to minimize the number of data tapes required, the Bureau of the Census prefers to furnish tapes at 1600 BPI or 6250 BPI densities.

A list and description of the reports available for 1983 data under this service, together with monthly and annual subscription costs, are shown on pages 4 and 5 for microfiche and page 7 for magnetic tape. Costs for microfiche copies of selected schedules from certain reports are shown on page 6. Costs for other extracts of individual reports may be obtained by writing to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

If you wish to subscribe to any of the reports listed, please complete the appropriate enclosed order form and return it with your check or money order to the Bureau of the Census. (Prepayment is required on all orders.) Requests for prior years' data should be directed to the Bureau of the Census for an official estimate. Additional order forms for subscriptions to reports listed on pages 9, 11, and 13 may be obtained by writing to the Bureau of the Census, Washington, D.C. 20233.

NOTICE TO USERS OF CENSUS COMPUTER TAPE COPIES

The Bureau of the Census has taken all reasonable precautions to insure that information recorded on the magnetic tape you purchase will be readable on your equipment. When filling customer orders only new tapes are used. The Bureau tapes are purchased from manufacturers on the General Services Administration's approved list of suppliers. The tapes have been subjected to demanding quality control procedures during manufacture and prior to acceptance by the Government.

Packaging procedures when preparing tapes for shipment are those generally recommended by suppliers. The tape is secured with a stopper, placed in its plastic container, then packed in a corrugated box.

If you encounter problems in reading the tapes you receive, we suggest that you request calibration tests on your own tape units before you communicate with us. When you are assured that you have received a defective recording from us, please document the problem as thoroughly as possible and return the defective tape and problem documentation to:

**Chief, Tape Management Section
Computer Operations Division
Bureau of the Census
Washington, D.C. 20233**

CONDITIONS OF AGREEMENT

1. The authority to perform special work or services on a cost basis is contained in title 13, U.S.C. 8 and title 15, U.S.C. 1525 (84 Stat. 864), relating to services for other organizations and persons. The performance of the work or services involved is authorized only to the extent that they are consistent with the proper performance of the basic public duties and obligations of the Bureau of the Census and the relative importance of this request to others. The right is reserved, therefore, to reject or terminate all or any part of the agreement and return the unused balance of funds advanced if the exigencies of the public interest should require such action.
2. Although every reasonable effort is made to avoid delays, failures, and errors in the performance of its work, it is understood that the Bureau of the Census is not to be held responsible for delays, failures, or errors in the services performed. The cost of recompilations, corrections, or accelerations must be paid for by the requesting party.
3. The information is furnished subject to the limitations and qualifications, if any, transmitted with the information and the requesting party will respect such limitations in any public use of the information. The Bureau of the Census reserves the right to specify that the material is for use of the purchaser only and may not be published, or to require clearance of any proposed publication of the information. If all of the basic data involved were collected under Government supervision or received by the Government in the regular course of business, the right is reserved to publish the same information and make it generally available without charge or at cost of publication if the Bureau of the Census regards the information to be of general public interest.
4. Ordinarily, the information, files, and records are retained for a period of 5 years from date of origin except that electronic data tapes may be blanked after 90 days unless specific arrangements in writing are made to the contrary. It is understood, however, that the Bureau of the Census is not obligated in any way to retain such files and records for any specific period and may dispose of them at such times and in such manner as it may determine appropriate, subject to the regulations of the General Services Administration.

Reports Order Form

Selected Printouts of Foreign Trade Commodities

January—December 1983

The Bureau of the Census Foreign Trade Division makes available, on a subscription basis, statistical data in the form of microfiche printouts, covering selected commodities from reports IM 145X, IM 145Y, IM 146, EM 522, and EM 546. The cost is based on furnishing data in units of 1 to 10 commodity numbers.

If you wish to subscribe to this service, please complete the enclosed order form and return it with your check or money order made payable to Commerce—Census. Requests for data prior to 1983 will be provided at an additional cost. Questions concerning Foreign Trade Reports should be directed to the Bureau of the Census, Foreign Trade Division, Washington, D.C. 20233, for an official cost estimate.

It should be noted that complete microfiche reports are available for reference in selected Department of Commerce Field Offices located in most major cities of the United States, and are also available for purchase from the Bureau of the Census, Foreign Trade Division. A separate order form is available for this service.

Conditions of Agreement

1. The authority to perform special work or services on a cost basis is contained in title 13, U.S.C. 8 and title 15, U.S.C. 1525 (84 Stat. 864), relating to services for other organizations and persons. The performance of the work or services involved is authorized only to the extent that they are consistent with the proper performance of the basic public duties and obligations of the Bureau of the Census and the relative importance of this request to others. The right is reserved, therefore, to reject or terminate all or any part of the agreement and return the unused balance of funds advanced if the exigencies of the public interest should require such action.

2. Although every reasonable effort is made to avoid delays, failures, and errors in the performance of its work,

it is understood that the Bureau of the Census is not to be held responsible for delays, failures, or errors in the services performed. The cost of recomputations, corrections, or accelerations must be paid for by the requesting party.

3. The information is furnished subject to the limitations and qualifications, if any, transmitted with the information and the requesting party will respect such limitations in any public use of the information. The Bureau of the Census reserves the right to specify that the material is for use of the purchaser only and may not be published, or to require clearance of any proposed publication of the information. If all of the basic data involved were collected under Government supervision or received by the Government in the regular course of

business, the right is reserved to publish the same information and make it generally available without charge or at cost of publication if the Bureau of the Census regards the information to be of general public interest.

4. Ordinarily, the information, files, and records are retained for a period of 5 years from date of origin except that electronic data tapes may be blanked after 90 days unless specific arrangements in writing are made to the contrary. It is understood, however, that the Bureau of the Census is not obligated in any way to retain such files and records for any specific period and may dispose of them at such times and in such manner as it may determine appropriate, subject to the regulations of the General Services Administration.

Report Number and Description For Microfiche Printouts

NOTE These reports are available from the Bureau of the Census. *Use order form on page 3.*

Reports	Subscription price for 1 to 10 commodities <u>1/</u>

1/ If additional space is needed, attach a separate sheet itemizing the reports and commodity numbers desired.2/ Please use Schedule B and TSUSA Numbers in effect for 1983.3/ Cost is based on furnishing data in units of 1 to 10 commodity numbers. Price will not vary with purchase of less than 10 numbers. For more than 10 but less than 21 numbers, subscription cost will be double the stated price.4/ Add \$3.00 to cost of each report for foreign airmail postage.5/ Remittances from foreign countries should be made by international money order or draft on a United States bank.6/ Prepayment is required on all orders.

Special Announcements and Special Notices

The special announcements and special notices, frequently issued by the Census Bureau's Foreign Trade Division, contain information supplementing the monthly and annual U.S. merchandise trade export, import, vessel and air statistics. Special announcements and notices are issued to assure that the users of the statistics are kept fully informed of matters pertaining to U.S. foreign trade. Examples of the various topics covered in these announcements and notices include:

1. Changes in compilation procedures;
2. Changes in export and import commodity classifications;
3. Changes in export and import statistical coverage;
4. Changes in statistical month for exports and imports;
5. Changes in the valuation of imports;
6. Changes in world area groupings;
7. Confidentiality of the trade data;
8. Historical export and import information;
9. Planned changes in export and import reports; and
10. Revisions to the export and import statistics previously issued.

The procedures for issuing the Special Announcements and Notices are generally as follows:

Special Announcements

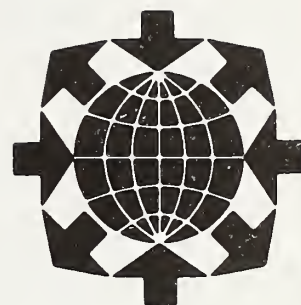

1. Announcements always consist of a brief text;
2. Announcements, as necessary, will include a text and chart;
3. Announcements are issued as a part of a monthly and/or annual publications;

4. Topics of announcements are listed on the contents page of the publication;
5. Timing of release of each announcement is determined by the publications' schedule. Announcements usually appear in publications issued for the statistical period to which the information in the announcements apply; otherwise the announcements are included in subsequent issues of the publications.

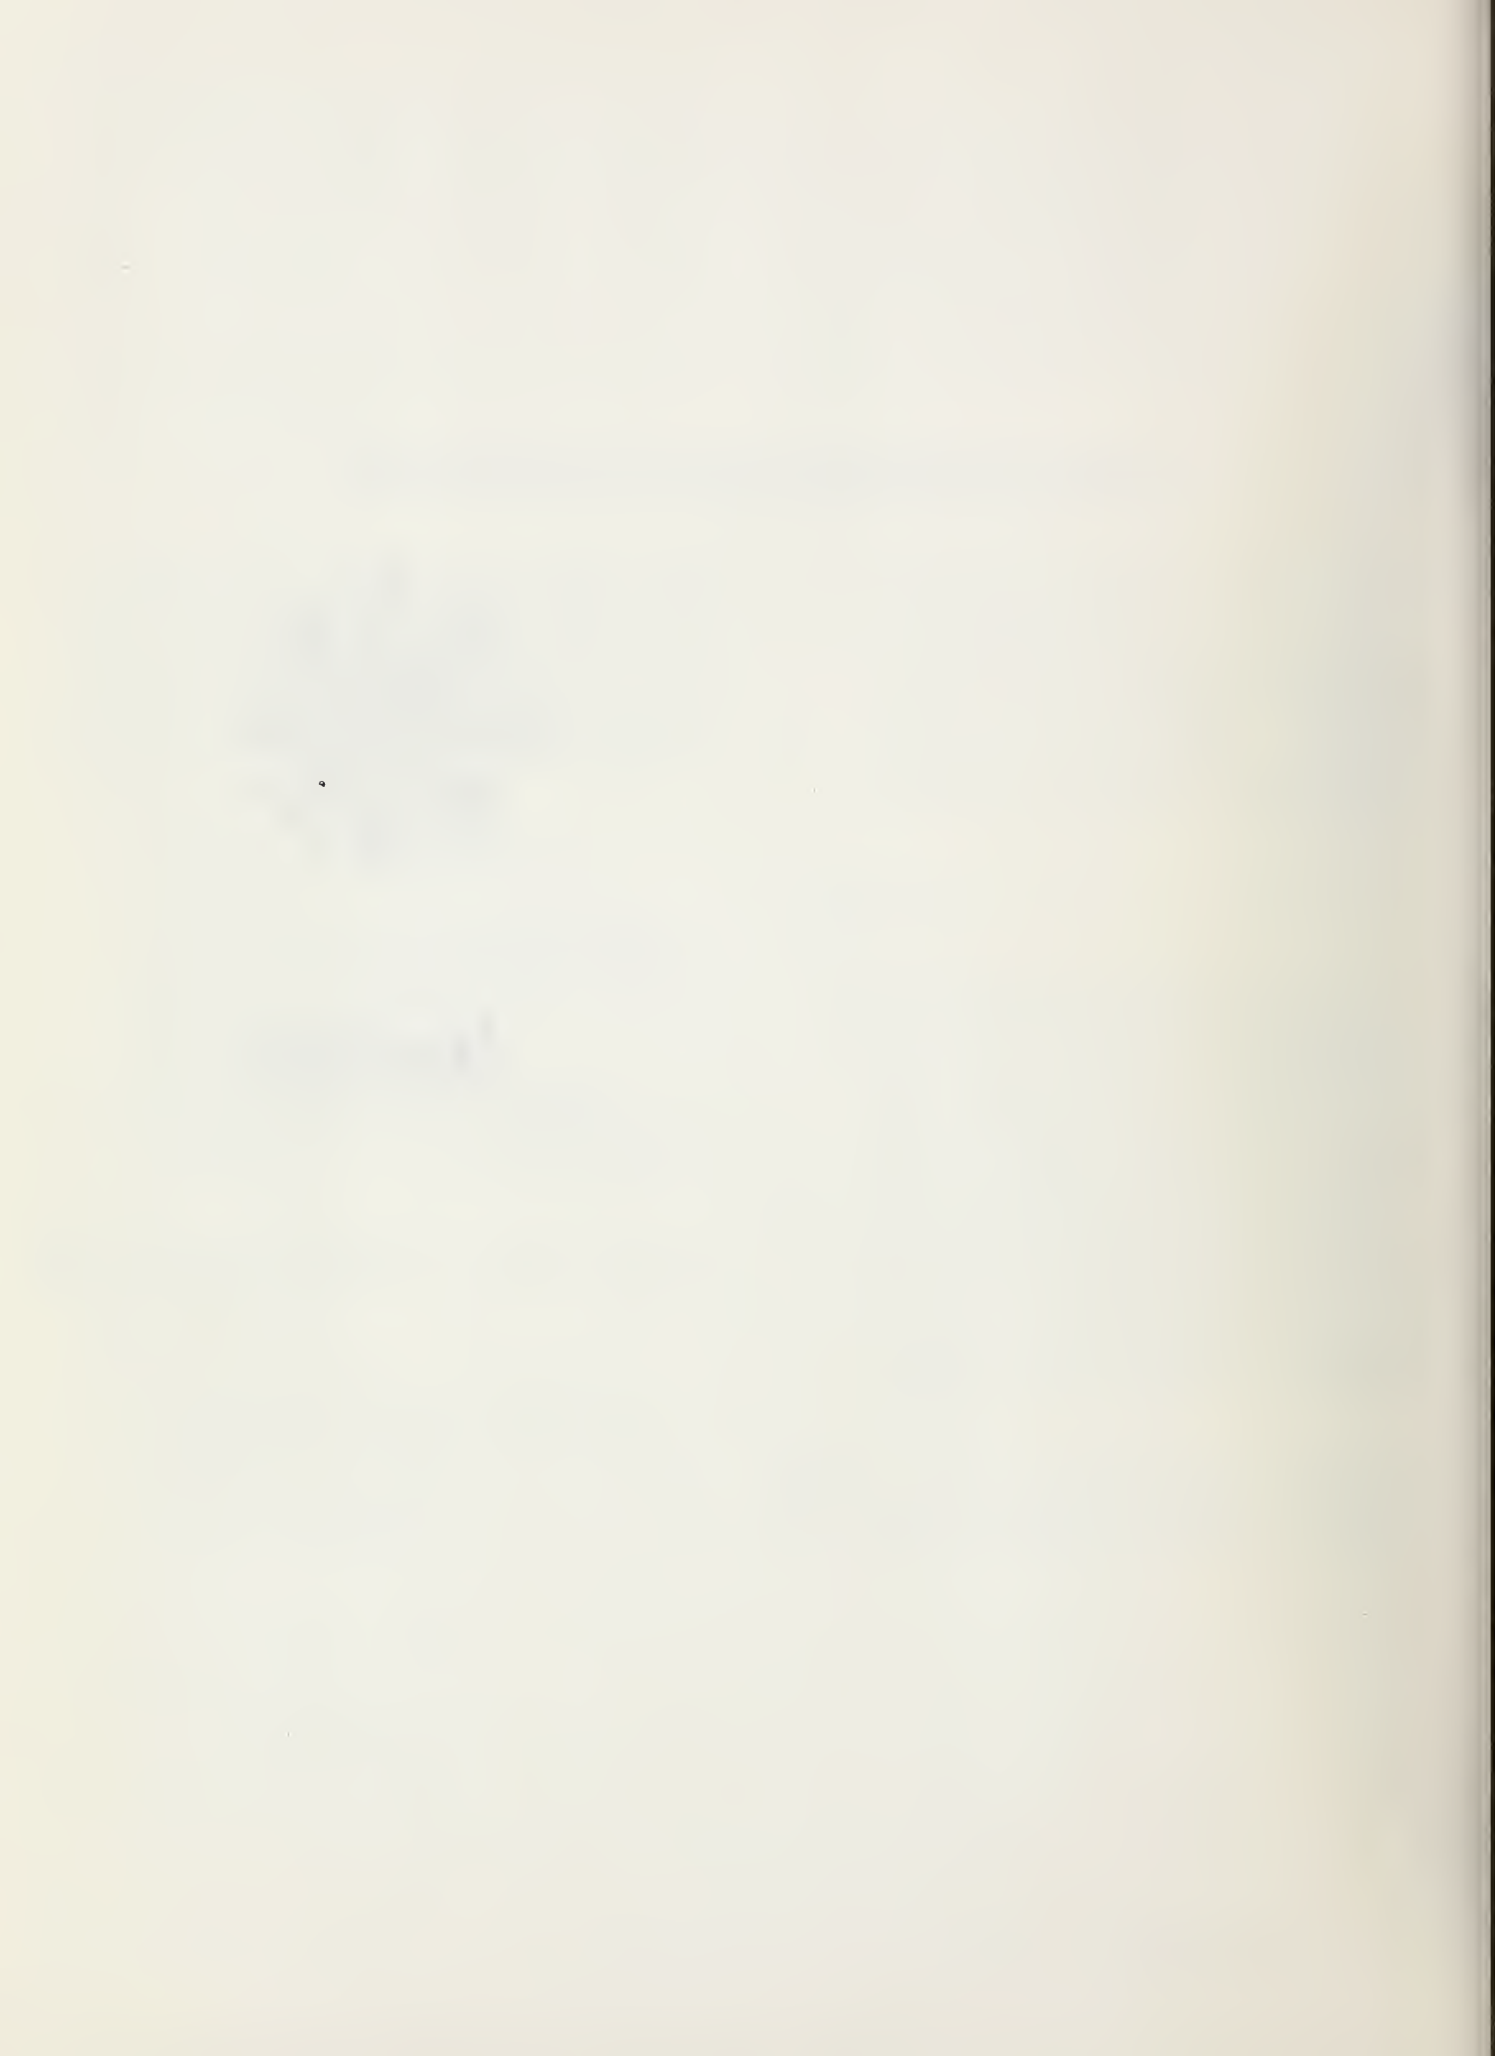

Special Notices

1. Notices always consist of a brief text;
2. Notices, as necessary, will include a text and chart;
3. Notices are forwarded to recipients of the tabulations, microform and magnetic tape reports as soon as available. The notices usually accompany the report for the statistical period to which the information in the notices apply; otherwise, the notices are forwarded with subsequent issues of the reports;
4. Notices are printed on U.S. Department of Commerce-Bureau of the Census stationery. Prominently featured, on each notice, are symbols which identify the item as a foreign trade statistics notice; specify the month and year of issue; and specify the statistical series (i.e., export, import, vessel, air...) to which the notice applies.

Additional information concerning special announcements and notices can be obtained by contacting Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.
